Profile

Expertise in front end development, interaction design, information architecture, accessibility, coding and web standards.

I have been working on the web since 2012. I am a data driven designer, shaping user experiences based on user research and analysis of quantitative and qualitative data. I combine this analytical approach to design with strong visual design skills and natural artistic ability. This enables me to develop products that are both visually engaging and highly usable.

Experience of all stages of project life cycle including:

- Gathering business and user requirements
- HTML prototyping
- Usability testing
- Front end development with React and related libraries for the last 5 years.
- Website deployment

Skills

Hand code HTML and CSS to W3C standards and have a strong understanding of WCAG 2.0 and front-end best practices.

I build solid user interfaces using progressive enhancement and strive for consistent user experiences across browsers and devices. I have a strong graphic design background.

Web technologies

- Expert knowledge of the HTML 4.01, HTML 5, CSS2, CSS3, CSS Animations, Sass/SCSS, Webpack2, BEM Methodology.
- Proficient knowledge of Bootstrap, Foundation Technology.
- Proficient knowledge in Javascript, ECMAScript 6, jQuery, AJAX, JSON.

- Experience in Angular - 2/4+, Angular Universal (pre-rendering), Ember Js, Typescript, Phantom JS, Json, JS Render, Google Map api, Twitter api, NVD3-charts, Charts js, AM Charts.
- Proficient knowledge in React, Redux and application libraries such as storybook.
- Drupal 7 theme customization.
- Expert in Photoshop template designing & Illustrator,Gimp.
- Expert in version control Git, Ubuntu 14.04, Jira.

Projects Experience

Car portal(Expedia)

A web portal for online booking of prepaid and postpaid cars of different models, providers and various other features consuming the product services within the organization to get real time results. The application was built with Ember js. Used HTML 5 prototyping and maintained BEM methodology for organised styling.

Technologies Used: HTML-5, Ember js, Grunt, Node js, CSS3, CSS3 Media Query, SASS, Jquery, Foundation, Ajax, Restful Api service, Git, Optimizely (for AB testing), Ensign Tag manager, Jenkins.

Travel App(JTB)

A web portal for online booking for travel purposes in air, hotel, cruise, rail etc consuming the product services within the organization to get real time results. The application was built with Server rendering technology (Angular Universal) for creating an SEO friendly and performance optimized application. Used HTML 5 prototyping and maintained BEM methodology for organised styling.

Technologies Used: HTML-5, Angular - 4 Universal (pre-rendering), Typescript, Webpack 2, Node express server, CSS3, CSS3 Media Query, Jquery, Bootstrap, Ajax, Restful Api service, Git, SVN.

Thread Web and Mobile App

A web application is to have a refined and enhanced user experience to replace the pre-existing application, and a more effective integration between the application and the data stored in Thread's Salesforce.com instance. The focus should also be on accommodating a larger variety of user types and integrating business intelligence and analytics into the application. The website is built with Drupal CMS framework and uses Bootstrap to manage responsiveness.

Technologies Used: HTML-5, CSS3, CSS3 Media Query, Jquery, Chart js, Bootstrap, Ajax, Api service, Git, Angular 2.

UNDP

A web application to manage the contents which is built in Drupal -7, allows the non-technical users to update the content. All the pages are responsive, we used Bootstrap to achieve this.

Technologies Used : HTML-5, CSS3, CSS3 Media Query, Jquery, Git, Drupal CMS template customization.

Nine Tenth Portal (takamol)

For the last three months, I have been working for Nine Ten portals.

NineTen is a portal providing various services for citizens of Saudi owned by a semi Government Company. The portals are built in the Drupal CMS frame of PHP. I am taking the role of CMS integration, related API integration.

Technologies Used : HTML-5, CSS3, JQuery, Ajax, JS Prototyping, Drupal based js scripting, Json parsing, AM charts, Google Map API, HERE Map API, Git merge flow, Angular JS, Gulp, Bower.

Career Labs

Career Labs is a complete module for career with millions of job suggestions and advice and analysis of various company information. It was a Big Data project. I took the role as front end developer. The Agile team that I was on built a desktop version and mobile version of the site.

Technologies Used : HTML, CSS3, FTL, JQuery, Ajax, JS render for json parsing, JS views, NVD3 Charts, Git rebase flow.

IIMB Website Maintenance

IIMB website needed to be re-design with a new UI design and made responsive. The website CMS was made on Drupal -6.

Technologies Used : HTML, CSS3, JQuery, Ajax, Javascript, Git merge flow.

Unielement

In house projects relate to server space and domain services. Job board for Solutino Singapore. Did web and mobile versions.

Technologies Used : HTML-5, CSS3, JQuery, Ajax, PHP

Supremacy

In project relate to Event management. Job board for Singapore Client.

Technologies Used : Bootstrap Technology(responsive), HTML-5, CSS3, JQuery, Ajax, PHP.

MyonlyWay

The project relates to religion. Job board for US Clients.

Technologies Used : Bootstrap Technology(responsive), HTML-5,CSS3,Jquery,Ajax,PHP.

Mirest Group

In house projects relate to Event management. Job board for Mirest Singapore.

Take part in back end Site management.

Technologies Used : HTML-5, CSS3,Jquery, Ajax, PHP

Education and Qualifications

2007-2011 Muslim Association College of Engineering

B-TECH Electronics & Communication.

Training & Certification

ASP,.NET from CDAC Trivandrum.
