## Full Stack Developer

---

The real secret of success is enthusiasm

---

EXPERTISE	PROFILE
OOPS Multi-tier applications Web applications Micro Services Training & Development	<ul style="list-style-type: none"><li>• 4+ years of good knowledge of object-oriented programming (OOPS) in <b>JAVA</b> in developing Web Applications with n tier architecture as software developer and designer.</li><li>• Developed various applications using <b>Java SpringBoot, MicroServices, Angular, React, MySQL, postgresQL</b> and <b>Redis</b>.</li><li>• Having baisc working experience with <b>Microservices</b>.</li><li>• Implemented <b>Time based Job</b> Called <b>crons</b>.</li><li>• Strong experience in migrating legacy applications into web applications with n tire architecture using complete Agile methodologies.</li><li>• <b>Working closely</b> with Business Analysts, team leads and assigned project managers/Scrum masters to follow <b>best practice business and technical analysis principles</b> such as process analysis and definition using Agile Sprint and structured approaches etc.</li><li>• Ability to communicate and <b>defend ideas clearly in grooming, technical and non-technical meetings</b> and also motivate a smart and talented group of engineers in organization.</li><li>• Experience in engaging with Engineering teams such as Infrastructure, Configuration Management and understanding of deployment tools and Continues integration to support continued deliveries.</li><li>• Identify and raise risks, issues, assumptions, dependencies etc to support solution delivery.</li><li>• Attending <b>Grooming and Technical sessions</b> to understand the business requirements of products and participating actively in Q&amp;A sessions.</li></ul>

### TECHNICAL SKILLS

Technologies	<b>Programming</b> – Java SpringBoot, JPA, MyBatis <b>UI Programming</b> – Angular 11, React js <b>Services</b> - MicroServices GitLab, Schedulers
Database	My SQL, Redis
Operating Systems	Windows

## PROFESSIONAL EXPERIENCE

---

**ZKTeco Biometrics India Private Limited**

**Java Developer**

**17Feb 2022 - 25 April 2024**

---

### **Project : Web Punch**

Web punch can be used to make punches from web applications on tablets. Depending on types of clients will provide the functional keys to make punches. Capture accurate timestamps for punches, and maintain a detailed log of all punches made by employees. Design the user interface with a focus on usability, making it intuitive and accessible to all employees.

#### **Roles & Responsibilities:**

- Implemented the Restful services to work with the web punch module.
- Created web pages using react.
- Developed reusable pages for future purpose.
- Used React Redux for state management.
- Created db schema for terminal registration.
- Responsible for understanding business requirements, analyzing the client needs and identifying the best possible solution.
- Handled all the virtual device initialization related things in the project.
- Developed web pages as per customer needs for web punch project to handle punches.

Used Technologies: **Java SpringBoot, React** and **MyBatis**

### **Project : DMS(Device Management Service)**

The main purpose of the devices is to provide security to organizations around the world. DMS used to manage both SDMS & DBs devices. Depending on types of devices will forward the request to a particular API based on some parameters. The devices include attendance devices. The devices can identify the persons based upon their bio-metrics..

#### **Roles & Responsibilities:**

- Implemented interface to integrate with the hardware device to run the software.
- Developed DAO's and their functionality with Spring Data JPA.
- Developed Restful services to work with the web service module.
- Spring Beans creation and injection into Spring Controllers and using Spring IOC mechanisms.
- Added API Gateway for handling multiple services.
- Responsible for understanding business requirements, analyzing client needs and identifying the best possible solution.
- Handled all the device initialization related things in the project.

Used Technologies: **Java SpringBoot, JPA,** and **MicroServices**

**Project: MotorCraft**

Motorcraft is an online store for selling batteries & spare parts. It helps users easily identify the appropriate batteries for their cars. In this project we've two types of deliveries based on customer requirements.

**Project: Bumper To Bumper**

Bumper To Bumper(B2B) is a web application. The main aim of this project is it will offer different kinds of services for cars like washing service, engine oil change etc. In this project we mainly have Door to Door service and Mobile Van service.

**Roles & Responsibilities:**

- Developed the Restful services to work with the web service module.
- Spring Beans creation and injection into Spring Controllers and using Spring IOC mechanisms.
- Written DAO's and their implementations with hibernate.
- Responsible for understanding business requirements, analyzing the client needs and identifying the best possible solution.
- Flexibility & Adaptability in regards with new technologies and environments.
- Implemented custom page validations as per the requirement.
- Involved in supporting the testing team to fix the bugs.
- Implemented angular web pages that will support desktops, mobiles and tablets using angular flex layout.
- Worked admin application that will help to control the main application.
- Involved in supporting the testing team to fix the bugs.
- Worked on validations for the application.
- Worked extensively with Angular CLI for creating components, Services, pipes, Directives.

Used Technologies: **Java SpringBoot** and **Angular 11**

**EDUCATION QUALIFICATION**

- Bachelor of Technology in Electronics & Communications Engineering, under Jawaharlal Nehru Technological University Kakinada 2016 with Aggregate – 66%.
- Intermediate in MPC Under State Board of Technical Education and Training, A.P with 72%.
- SSC under State Board of Secondary Education, A.P with 73%.
