Curriculum Vitae

	Name: **MOHAMMED KAPADIA**
	Address: Govind Pandu Building, Plot 463, 2nd Floor, Turbhe Sector 24, Navi Mumbai, India, 400705
	Contact Number:(+91) 9022688574, (+91)7021915101
	Mail Id: mohammedkai172574@gmail.com
	Skype Name: Mohammed Kapadia
	LinkedIn URL: https://www.linkedin.com/in/mohammed-kapadia-/
	Sex: Male **|** Date of Birth: 13/12/1994	Nationality: Indian

PERSONAL STATEMENT	
	Senior Software Engineer with 6.6 years of experience in all facets of IT domain with primary emphasis in **Javascript(Node, Vue & React)**, **Java / J2EE** enterprise web application analysis, design, development, implementation, maintenance & support - Adept in designing independent applications and upgrading existing applications as per business specifications - Demonstrated expertise in requirements analysis, unit testing, integration testing and production deployments - Good knowledge in Amazon Web Services like EC2, S3, Cloud Watch, Dynamo DB and hands-on experience utilising Spring MVC, Spring Templates, Core Java concepts i.e. Exception Handling and Collection - Conversant with the Vue.js ecosystem comprising - Vue CLI, Vuex and Vue Router - Profound hands-on expertise in end-to-end Software Development Life Cycle including requirement analysis, design, coding, testing, debugging and maintenance - Handled deployment, production releases and bug fix in a fast paced environments and adept in evaluating, identifying the root cause while optimizing the code - Proficient in devising innovative & custom-made solutions to support businesses accomplish their goals in diverse industries - Competent in innovative skills and conversant with leading programming tools with

WORK EXPERIENCE	
May 2022 – Till Date	**Senior Full stack Engineer**
	Agile Engine, India
#1 Project Title & Client	**POM = Privacy Operations Manager – "Wirewheel"**
Key Deliverables:	- A key member of the team which unveils single-page web applications targeting all, modern platforms for both in-app and browser. - Test-driven development (tdd) with jest for unit-testing and code. - Working directly with client stakeholders to develop technical solutions for business cases. - Creating modular, responsive templates using modern CSS techniques and JavaScript libraries. - Developed application for different browsers and fixed bugs for browser compatibility and accessibility issues. - Developing and maintaining all server-side network components. - Creating Vue Js reusable components, used Axios with Vuex for making AJAX calls, worked on webpack for build. - Creating Restful web services using feather js.
Technologies	Node Js, Vue Js, HTML5, CSS, Jest, Git, Mongo db, AWS,Java 8

Sep 2021 – May 2022	**Senior Software Engineer**
	CitiusTech, India
#1 Project Title & Client	**Connectivity of Enterprise carescape bridge - "GE-Healthcare"**
Key Deliverables:	- Participation in Design Architecture Discussion of features in product . - Design and development of application using Java,Spring,RTI,Docker,Jenkins and relevant technology stack. - Extensively using different type of Collections and Design Patterns for different type of Devices Modes. - Writing Junit test ,Static code Analysis for Code Quality and Creating and Implement BDD's for various business scenarios. - Review And discuss Code of software developers Sr software developers on Collaborator Tool.
Technologies	Java 8, Docker, Gradle ,Jenkins ,Cucumber, Spring Boot, Maven, Microservices, RTI DDS,
Jan 2019 – May 2021	**Software Engineer**
	Morningstar, India
#1 Project Title & Client	Commodities App (USA & Europe)
Key Deliverables:	- Actively engaged in vast gamut of tasks entailing - developing user-facing applications using Vue.js; building modular/reusable components/libraries; optimizing the application for performance; writing unit/integration tests using Jest framework; integrating third-party API's and so on - Efficiently building web pages which are responsive on every platform (smartphones/ iPad/desktop); creating &maintaining server-side application logic; building rest API endpoint using node framework express and integration of MySql database with Node
Technologies	Vue, Node Js, React Js , MySql, Amazon
#2 Project Title & Client	Marketplace (USA & Europe)
Key Deliverables:	- Integral role in broad spectrum of activities comprising of – implementation of object-relation mapping in the persistence layer utilising hibernate (ORM) framework; using DAO patterns along with mapping DAO objects; configuration of file & classes for collaboration with database; using NOSQL database Amazon dynamo DB to store data of reporting application etc. - Efficiently built application using MAVEN / Log4J to generate log files for the application; developed numerous REST web services supporting XML / JSON to perform tasks; debugging production issues/root cause analysis and fixing - Managed wide array of tasks which includes –development of UI utilising HTML / JavaScript / Freemarker and generated business logic as well interfacing components using Java / XML / JPA - Effectively performed Jenkins build/deployment for upgrading the application to higher environments; utilised JUnit 5 / Mockito / Rest-Assured library to write test cases for Rest API and so on
Technologies	Spring MVC, Spring Security, JPA, AWS (Elastic Bean Stalk, S3, CloudWatch), Rest API
#3 Project Title & Client	Markets Commodities Edition (USA & Europe)

Key Deliverables:	• Significantly accountable for design & development GUI for applications/modules, utilising JavaScript; designed seasonal charting/forward curves; real-time streaming news; integrated Microsoft Excel features i.e. lookups/several kind of formulas etc. • Instrumental in participation of daily Scrum meetings and stringent adherence to best practices for JavaScript frameworks/techniques • Effectively utilized Pagination component of jQuery for navigation; used DOM/AJAX to display page contents; engaged for using JQuery event handling in UI pages to display list boxes and to handle validations
Technologies	JavaScript, ES6 Spring MVC
Sep 2016 – Dec 2018	**Software Engineer**
	Iris Business Sevie, India
#4 Project Title	RBI
Key Deliverables:	• Key role involvement in implementation of new web services to enhance the functionality; development of pages using JSP/struts framework; design& development of tables in Oracle database and creation of DAO classes • Played a vital role in array of activities entailing – functional testing; training & development of users to have hands-on experience on the application; used XML (XBRL format) for data exchange and DOM parser to extract/read the required information from XML **Key Accomplishments** • Developed many scheduler(.exe application) for data migration • Developed a count scheduler which gets the count & summation from various tables and safeguarding that the data has been migrated properly • Developed scheduler which checks for the set of data which has not been properly migrated and sends an email alert for the same
Technologies	Core Java (Collections), Struts 1.2, JSP, Oracle 10g, OC4J,Tomcat
EDUCATION	
2012 – 2015	• Bachelor of Science (Computer Science) from Motilal Jhunjhunwala College, India
CERTIFICATIONS / TRAININGS	
	• Certified Android Developer • Software Engineering from NIIT, India
TECHNICAL SKILLS	

Code Development Tools Eclipse, Intellij	Jira,AWS, Restful API's	Sonarqube
Agile	Scripting / Markup Languages HTML / HTML 5, CSS / CSS3, JavaScript, JQuery, Ajax, XML	JavaScript Frameworks (Vue & Node)
OOPS,Solid Principles of Java, Java 8 (streams)	Databases Oracle 10g, MySQL	Application Server Web-logic, Tomcat

KEY SKILLS

• Coding & Development	• Client Relationship Management
• Requirement Analysis	• Training & Development
• Root Cause Analysis	• System Analysis & Design
• Design Patterns	• Project Planning
• Stakeholder Management	• Business Functions Integration
