### **BRIEF INTRODUCTION**

I have 5+ years of experience in software testing (Automation background). I have thorough knowledge of UFT (VB scripting Descriptive Programming). I can automate SAP (desktop and web) using UFT. I have knowledge on different automation frameworks, Object Repository Concepts, Data Table Concepts. I am trained into code debugging, defect raising and fixing as well. I have worked with MuleSoft Development team as well. I have an idea of BOBJ, Webi reports, DBeaver script execution and bug spotting. I can write SQL queries. I have experience into Salesforce (Functional and Automation). Currently I am handling 5+ Federal Files in coordination with Mule and Interface single handedly in my team. I also work on Application tickets and complex Change Requests.

### **#1. TATA CONSULTANCY SERVICES**

**PROJECTS WORKED - ROCHE DIAGNOSTICS (DEC 2018- JAN 2020)**  
**AMGEN ARGUS UPGRADE (MARCH 2018- NOV 2018)**  
**GSK PHARMACEUTICAL (MARCH 2017- MARCH 2018)**

- **UFT (VBS- Linear framework)** was used to automate SAP application as well as NWC SAP Net Weaver Portal (Excel, Outlook and PDF validation). I worked into SAP Automation Testing using **UFT (BPT Framework & Descriptive Programming)** for different business SAP modules like SD, WD, MM, R2R, FI. Defect management tool was HP ALM
- Maintained, debugged and optimized automation programs. Completed automation of functional and regression testing.
- Peer Reviewed test cases scripts for quality and identified additional areas to review.
- Discussed requirements and processes with project managers and developers.
- Maintenance and development of test cases for Web application - Argus using UFT -VBS (in house hybrid framework- OR and Descriptive programming) and the defect management tool used was HP ALM. Updated and maintained project documentation for detailed record keeping.
- Executing the business process scenarios using automated test scripts, developing, and Designing business components and test scripts for manual test cases and as per User Stories.
- Monitoring regression suites for 100% passed status, Documenting test cases in HP ALM (Raising, Resolving, Closing Defects). Kept on track with deadlines for development cycle times
- Direct interaction with the developers for test requirements, clarifications or bug fix, giving demos to the client to ensure deliverables are met as per expectations along with quality, also attended discussions with the project managers to assess scope and sequence of project.
- Effectively interacted with SAP consultants and specific module departments regarding defects and data issues, working closely to understand the functionality better.

### **#2. NTT DATA**

**PROJECTS WORKED - HONEYWELL (JAN 2020-JAN 2021)**

- I worked here as Senior Automation Tester with the onsite regression team for support and maintenance of test suit developed in UFT (VBS) using keyword driven framework.
- Functional knowledge and fixing of functional issues in SAP (MM, SD, WM, SC, OM, AM) also VB code fixes after careful observation of the test Report.

- Creation and execution of Pre-requisites using keyword driven framework in UFT. We also have a utility which we run before every patch or refresh.

### #3. **DELOITTE - USI**

#### **PROJECT WORKED - RED HAT (FEB 2021- OCT 2021)**

- Working with the BOBJ development team and dealing in SAP Business Objects, Universes, SQL & Column scoping, Table mapping Refreshing Webi reports in BI Launchpad, Data Analysis.
- Writing and maintaining Test cases for Webi reports.
- Defect raising in Rally and fixing them after analyzing the root cause.
- Writing and analyzing SQL queries to check and report data issue.
- Performing UAT and ETL testing and updating the test case accordingly.
- Attending daily Stand-up meetings with the team and management to discuss the challenges and the progress. Providing inputs and suggestion that helps in smooth and steady flow of the project.

#### **CURRENT PROJECT - STATE OF DELAWARE (OCT 2021- PRESENT)**

- Validation of simple to complex Change Requests and application tickets in Test and Prod environments. I work on data validation and E2E testing in Salesforce application.
- I am appreciated for writing accurate test cases, and for functional testing.
- I also work in Mulesoft Upgrade and Interface testing.
- I am the only tester in team to work on Federal files where I validate respective business rules.
- I drive the regression Automation testing of selenium scripts (Java/ Eclipse) also help team in execution and xpath fixes.

### **EDUCATION**

August 2012- August 2016

B-Tech from Indian Institute of Technical Education and Research, Bhubaneswar (SOA University)

### **SKILLS**

- |   |                                       |
|---|---------------------------------------|
| • Expertise in HP UFT/ QTP with VB Script | • Selenium, Java, C, C++              |
| • HP ALM                                  | • Agile Methodology, Software testing |
| • Salesforce, MuleSoft, Interface         | • SAP (SD, MM, SC, FI, OM, SC)        |

### **ACOMPLISHMENTS**

- **ICSC and ISC** certified schooling.
- ON-Spot Award/gems in GSK(TCS) for automating maximum number of Test Cases in team.
- Effective presentation and communication skill along with Professional business etiquettes.
- Resourceful, initiator, team worker & creative in solving issues.
