## PROFILE • ABOUT ME

A Game Tester/QA Tester with 4+ years of game testing & manual testing. Prodigious gaming/testing enthusiast with a keen eye to probe elusive glitches in software, websites, & games. Have vast knowledge of the leading-edge software trends in the field of testing, can comprehend and infer user's expectations from a software model, and can perform precisely observed and carefully documented testing operations. I seek to leverage my professional skills for the role of 'Game Tester/QA tester' in your regarded establishment, where I'd be able to showcase my aptitude for testing and upgrade my skills in the said field.

## WORK EXPERIENCE

- Manual Testing
- Regression Testing
- Creating Test Cases
- Adhoc Testing
- Smoke Testing
- User Experience Testing
- Exploratory Testing
- User Acceptance Testing
- Confluence

### Industry Knowledge :

- Testing
- System Testing
- Test Management
- Software Quality Management
- Game Testing
- Defect Reporting
- Web Testing
- Agile Methodology

- Maintain proper records of the design and implementation in the technical specification document built specific for manual and automation environment
- Intelligent Test Case writing skills– functional and non-functional requirements
- Requirements analysis and decomposition
- Test management tool knowledge (Requirements, Test Case Writing, Traceability, Defects)
- Understanding and implementation of the Agile development methodology
- Specify, design and implement modest changes to the existing manual and automation framework to meet changing needs as it arises.

#### QA engineer

October 2023 - Current

E-lock technologies Pune

Pune

Responsible for testing SaaS softwares for digital signatures.

Key Responsibilities:

- API testing
- Performance testing on cloud AWS
- Regression testing
- UI/UX testing
- Web testing

Leading and mentoring junior testers. Co-ordinating with developers to improve the functionalities.

## ENGINEERING/TECHNOLOGY

**Languages** – Python 9, Java

**Database** – MySQL

**Networks** – Cisco

**Hardware** – PC, Xbox, PS4, PS5, Android, iOS

**Development Tools** – Eclipse, Notepad++

## CAREER HIGHLIGHTS

Having a background in software development I have an understanding of the Software Development Life Cycle (SDLC) and the Software Defect Life Cycle (SDLC). My experience with methodologies helps me thrive in fast paced work settings ensuring efficient and high quality results.

Skilled in using JIRA for bug tracking and TestRail for test management I am adept at identifying, documenting and resolving software issues. With abilities, in Selenium WebDriver using Java and Python I can conduct robust automated testing.

### Software Knowledge :

- Microsoft Word
- Microsoft Excel
- Microsoft Powerpoint
- Jira
- Test Rail
- Bloomberg
- Xray
- Telescope
