Abdur Rashid. Imamoddin. Aleem (+917507858047)
AWS Certified Solutions Architect / Big Data Platform Architect - Cloudera Certified
(Hadoop | Security | Environment AWS | Distribution Cloudera (CDP) | Ansible | Kubernetes | Python)

Experience:

Serving as a key technical member of the Business Development team in helping to ensure customer success
in building applications and services on the Amazon Web Services platform.
Giving Scope to each customer engagement, with attention towards clear and well-defined objectives and success criteria.
Owning each technical engagement, and help ensure a timely and successful delivery of value.
Capturing and sharing best-practice knowledge amongst the solution architect community.
Understanding the Amazon Web Services market segments, customer base, and industry verticals
Understanding and exploiting internal Amazon systems.
Working with cloud platform evaluation, cost estimation and crafting roll-out plans
Working on Cloud Platform provided Big Data technologies and equally non-big data technologies (EC2, EMR, RedShift, S3)
Works on setting up Cloud platforms for Client's use-cases.
Working on programming frameworks - MapReduce, Spark, Scala.
Helping the customer to go from 0% to in the cloud to well over 90% and moving them to an environment where they just
need to think about their business.
Exposed to cutting-edge , bleeding edge, with very very established products.
Moving the needle on changing the way business operates
Working with all the teams and responsible for knowledge across all the products and services.
Power to influence the customer roadmaps.
Walked on-site with customer
Understanding of really really big picture concepts about where customers want to go and helping them to come up
with a plan to get them there
Keeping Always Day One as a Solutions Architect for the customer.
Building and designing architectures for our customers for some other hardest problems of technology.
Saving customers money and building optimize run, the best possible architecture.
Involving around the customer, and bringing the customer obsession to the table.
Writing White Papers, Writing some reference architecture, burning hands on stuff with new services coming out.
Providing the solutions with Scripting and automation tools(Python,Ansible)
Solutions to Increase Project Efficiency and Decrease Costs.
Capacity planning of the cloud infrastructure.
Working with customers who want to know more about aws cloud or who potentially want to deploy their application in a diverse cloud.
Explaining to customers how they can use all of building blocks and how they can have successful deployment one that secure reliable
scales appropriately is going to meet those needs

Certified AWS Solutions Architect / Big Data Platform Architect at phData Solutions,Bangalore
July 2018 - Present
