Paravesh V Rathod

Quality Analyst

SUMMARY

As a Quality Analyst with 3.3 years of experience in software testing, I have developed expertise in ensuring the quality and reliability of software applications. I have a strong understanding of software development methodologies and have experience working with agile development teams

KEY SKILLS

• **Mobile Testing** • **Functional testing** • **Database testing** • **Globalization testing** • **Web Service Testing using REST API** • **Process Improvement** • **Team Incubation**

TECHNICAL SKILLS

Tools/Languages: Core Java, SQL, Selenium Web Driver, Appium
Database: MySQL

EDUCATION

Bachelor of Engineering in Electronics and Telecommunication   Jun '13 - Jun '19
University of Amaravati   Pusad, IN

PROJECTS

Domain: Investment Banking | Tech Stack: Java |
- **Responsibilities:**
  - Requirement Analysis: Understanding the requirements and communicating with BA team for better understanding of the requirements.
  - Writing effective and optimized Test Cases in JIRA Tool using Black Box Testing techniques.
  - Performing Functional Testing, Regression Testing and Re-Testing.
  - Identified End to End Test Scenarios, Test Cases and Test Data.
  - Preparing transition document for other team members.
  - Performed Functionality Testing, Retesting and Regression Testing and marking the status in the defect management tool.
  - Also involved on the automation testing by using Selenium web driver
  - Creating the classes of POM and Test as per the requirement of the framework.
  - Involved in the daily scrum meeting.
  - Worked on both migration of existing scripts and development of new scripting selenium.
  - Active participation in weekly/daily status calls with the client.
  - Execution of test cases from Test Lab in JIRA Tool.
  - Creating and updating of the test scripts in regular interval by using the design principle called POM and controlling the execution with the help of TestNG Framework for the existing Data Driven Framework.
  - Responsible for Validation of log files and data through the UNIX and SQL.
  - Responsible for testing deliverables, prioritizes.

Domain: Insurance | Tech Stack: Java |
- **Responsibilities:**
  - Understand the requirements and clarify the doubts with BA.
  - Responsible for understanding the Database scheme and ER diagram.
  - To test back-end functionality of an application.
  - Responsible for gathering test execution data on daily basis and sending email to Team.
  - Writing down complex SQL queries.
  - Responsible for sending progress reports on the weekly basis and resolving technical issues.
  - Verifying database schema as per given design document.
  - Responsible for getting clarification from the Development Team regarding defects checking the logs using UNIX.
  - Logging the bugs in Defect Tracking Tool.
  - Checking data integrity and data correctness.
  - Execute SQL queries to check table updates and data retrieval.

• Responsible for providing Regression Test case Estimation for various customer requests.

PROFESSIONAL EXPERIENCE

Quality Analytics

Present - Present

Bengaluru, IN

- A detail oriented professional with **3.3 years of experience** in **Software testing** that includes experience in **Manual** and **Automation Testing** with expertise in **Insurance domain.**
- Strong experience in the entire Software Development Life Cycle **(SDLC)** and Software Testing Life Cycle **(STLC)** and specialized in Validation.
- Implemented **Agile Methodology** process in the project.
- Participate in **Scrum meeting** to discuss about project progress report every day.
- Prepared **weekly status Report.**
- Experience in identifying **object locators** and **creating Page Factory** for all the pages
- With core JAVA knowledge that consists of **OOPS** Concept, **Collection framework, Array** and **String class.**
- Experience in writing **Xpath** expression.
- I have good knowledge in **Appium.**
- Testing of **IOS** and **Android** app using mobile and automation.
- **Regression test** for IOS and Android
- Executed test scripts on **IE, Firefox** and **Google chrome**.
- Knowledge in **Core java concepts.**
- Experience in designed Functional decomposition **TestNG framework.**
- Performing internal reviews and estimates.
- Handled defect log using defect management tool such as, **JIRA** and prepared daily test status reports to communicate the test status with the team.
- Involved in executing **SQL Query** to perform database testing in SQL Developer.
- Basic Knowledge about **UNIX Commands.**
- Thoroughly involved in different types of testing like **Smoke, GUI, Functional Testing, Re Testing, Regression Testing, UI Testing, and Database Testing using SQL, API Webservices testing and Browser Compatibility Testing.**
- Able to design the **Traceability Matrix** to map Business Requirements with test Case.
- Worked on Repository management tool like **Git.**
- Extensive experience in developing SQL scripts to validate the databases tables and reports data for database testing using **DML and DDL commands.**
- Performed cross browser testing using **Automation through Selenium** on Web based (Browser) application.
- Developed User Defined functions to support the automated scripts. Used the Data driven **Testing-using Selenium**
- Experience in Automation Testing Tools like **Selenium Web Driver.**
- Clear understanding of Software Development Life Cycle models (**SDLC).**
- Commercial experience as a Tester within **Agile Development environment**.
- Able to run the test cases for all browser namely **Chrome** and **Firefox.**
- Experience in **Build Management Tool** which is Maven for the Data Driven Framework Knowledge in **Agile** with **Scrum.**
- Proficient experience in **Test Case Design, Test Execution, Bug tracking and Reporting**.

ADDITIONAL INFORMATION
