⇒ **Tools:** Workbench, Eclipse, Data Loader, Postman

⇒ **Programming Language:** Apex, CSS, HTML, JavaScript, Python

PROJECT DETAILS

Jade Global

Project: Nucleus - (SFDC)

(Salesforce Administrator, Salesforce Developer)

I worked as a Salesforce developer for US based client for Jade Global. I was responsible for development as well as administration. This was my first project as a Salesforce developer. The project was built from the scratch, so the Requirement gathering and the Development, both the tasks were performed by me:

1. Support to develop and fix for Salesforce Record types, Reports, Profile Creation, Sharing Setting, Validation Rules, Workflow & Approval Process, Custom Setting.
2. Customization as well as working on Test classes and development of Apex triggers, Apex Classes, Apex Controllers.
3. UI development on Visualforce pages with HTML, CSS, Javascript and back end with Apex Controllers.

Jade Global

Project: Marketo - (SFDC)

The project was based upon CPQ implementation and development, had Configuration and Customization:

1. Salesforce Record types, Reports, Profile Creation.
2. Development of Apex triggers, Apex Classes, Test Classes.
3. Creation of Custom Fields to capture any exceptions.
4. Configuration development which included Workflow Rules, Email Templates, Email Alerts, Field Updates.
5. Creating Price Rules, setting up products, creating filters.
6. Created Conga Templates too.

Grazitti

Project: Accruent- (SFDC)

The project was based on service cloud. Some of the highlights includes:

1. Worked on **Customer Community**.
2. Created custom feed table. Included functionalities of whether feed is read or unread, Subscribed or not. Helped me understand much more about **Connect Api for feed items**.
3. Included intensive **UI development**.
4. Created extensive **Aura Components**.
5. Worked on **Omni-Channel**.
6. Worked on **Zuora** and **Salesforce** integration via **Dell Boomi**.
7. Have a working knowledge of using **Postman**.
8. Worked on **Einstein Analytics**.
9. Wrote bunch of market standard **Triggers, Test Classes**.
