WORK EXPERIENCE

Salesforce | Student | Premium Learning System

2022 – current (6 Months learning)

1. Project Management App

Using this application, a company can manage their project lifecycle. They can create Client and Project records and maintain the relationship between them. The project manager has the authority to create new Requirements and assign tasks to the employees. The project manager can track the progress of the project and the tasks allocated to the employee. The release object can be used to send a mail to the manager and the client to inform them about the release of the new feature or project.

Role & Responsibility:

- | | |
|---|---|
| 1. Design and Development of Schema | 2. Creating Data Model Objects and Fields |
| 3. Creating Business Process Automation | 4. Developing Apex Class, Asynchronous Apex & Apex Trigger. |

2. Residential Society Management App

The society management staff can use this application to create new Members and track their Maintenance records. The maintenance object keeps track of the members who have paid the maintenance amount and which members have their maintenance amount due. Staff can also send mail to the members reminding them to pay the society maintenance fee. On receiving the amount an acknowledgment message is sent to the member. Security guards can use the visitor object to enter data of all the Visitors that pay a visit to the member so the Society in a day and maintain all the details such as relationship with the member, contact details, and reason for the visit.

Role & Responsibility:

- | | |
|---|--|
| 1. Design and Development of Schema | 2. Creating Data Model Object and Fields |
| 3. Creating Business Process Automation | 4. Developing Visualforce pages, Apex Controller and Apex Trigger. |
