Project #1

Project Title   : Item Content Editing Tool.
Role   : Design , Development And Maintenance.
Environment   : Pandas, Django, Flask and SQL.
Tools used   : Pycharm and Spyder.

Project Description :

        Item Content Editing Tool is a web application. It is primarily used by the content enrichment team to modify the details of the product before the product moves online. Usually, the seller of the product would not provide a very good description of the product, in that case, the internal Content enrichment team would modify the details of the product using this Icet tool. Once the content enrichment is completed product details would save to the final database.
