About me

Tech Lead with 12 Years of Experience in System Design, Full Stack Development, Cloud Technologies, and Agile Methodology; Skilled in .NET Core, React, Azure, AWS, C#, SQL, and JavaScript

Profile Summary

As a Tech Lead with 12 years of experience, I have developed a strong background in enterprise application development, microservice architecture, and distributed systems. I am proficient in Azure, C#.NET Core, Cosmos, and Azure DevOps pipeline for build and release. My expertise extends to front-end technologies and frameworks such as React, Redux, Angular 5, Node.js, Meteor, Kendo UI, Karma, Jasmine, and TypeScript. I have worked with cloud platforms like AWS and Azure, and have experience in database design, query optimization, and migrations. I am skilled in team handling, adapting to new technologies, and working with global distributed teams. My work history includes roles in Neudesic, Maersk, Eton Solutions, Harman Connected Service, The Digital Group, IdeaToWorking, and Technobliss.

60 Days

Medical Inventory Management

It is a Network based desktop application for management of the client company. It includes stock management, different medical ledgers, purchase, sale, challan, sale return, purchase return, different stock reports, warning reports, salesman commission and management

122 Days

Application forwarding System

It was Network based Desktop Application. The aims at receiving application from people and pass it to General Manager , Supervisor and Engineer. These people pass the application to be solved to its employees with specific time period. After completion the above people approve the result and pass it to applicant. The system server an interactive notification system for each level of application forward . It has very good architecture for converting hard copy into soft copy and display of this soft copy. The interactivity increase with notification system and user based dashboard.
