## SUMMARY

Overall **15+** years of experience, Salesforce certified B2C commerce architect with proven expertise in Multi-Cloud Salesforce ecosystem that includes hands-on end-to-end Salesforce Commerce Cloud (SFRA, OCAPI, Headless APIS) & Salesforce B2C Commerce implementation, Einstein (AI), Cross-cloud integration with Salesforce Service cloud, Salesforce Marketing cloud etc. Have extensive experience in architecting, implementing end to end omni channel multi - site SFCC Storefront which includes several third-party integrations.

Experienced in developing technology focused business transformation Strategy and implementation by leveraging best in class cloud-based solutions. Skilled in Digital Strategy, Omni-Channel Commerce, Enterprise architecture, and Agile Methodologies.

Below are my main responsibilities

- Requirement analysis, designing, architecting, troubleshooting prod issues and hands-on implementation when required.
- Leading offshore based development team and oversee the delivery with respect to development, design, and implementation.
- Meetings with business stakeholders and external stakeholders on the technology initiatives.
- Review the project processes like quality attribute, matrix and monitor the quality index for the project.
- Working with sales team where I would be giving demo on SFRA capabilities and overall commerce cloud features mainly to introduce the customer into SFCC ecosystem
- Managing discovery phase to identify what customization is required, identifying system of records, data flow in and out of various system
- Responsible for overall project estimation, and creating TSD for all the customizations that are required
- Responsible for overall delivery in terms of giving support in sprint planning, managing the team , code review etc. • Hands on development
- Helping business on their day-to-day site merchandising activities

## EXPERIENCE

### Indigo

Commerce cloud architect  
2023 (June) - Present

#### Accomplishments

- Storefront implementation using SFRA
- Pricing and promotion customization
- Vertex Tax cartridge customization
- Shipping and Tax calculation customization
- Customization to support seamless OMS integration

### DeltaFaucet

2015 (March) – 2016(Nov)

### **Accomplishments**

- End to end omni channel storefront using ATG commerce
- Integrations with various payment providers
- Migrating ATG based commerce storefront to micro-service based applications using Spring boot and ReactJS

## **B&Q PLC**

ATG Senior developer  
2012 (March) – 2015(Feb)

B&Q plc, originally known as Block & Quayle, is a British multinational DIY and home improvement retailing company headquartered in Eastleigh, England, United Kingdom. The project is all about to create a Agent facing application for DIY.com in ATG platform. The aim was not to use inbuilt CSC module completely but to inject a service layer and build the front-end part from scratch. This will help BNQ to deploy CSC functionalities as set of services and can be utilized from none ATG platform. I have designed the Amendment of submitted order & return order flow [cart, checkout and integration with fulfilment system] also I could involve the end-to-end architecture of the system.

## **Walgreen**

ATG Senior developer  
2010 (Jan) – 2012(March)

Purpose of this project is to implement the store specific order [click and collect] for Walgreens I have involved in this project starting from the requirement analysis, low level design, and implementation.

## **Training & Courses**
