WORK EXPERIENCE

Systems Engineer
Infosys

08/2019 - Present   *Pune,Maharashtra*

Achievements/Tasks

- Developed various REST API's using Spring Boot framework.
- Worked on Spring Data JPA with Hibernate for fetching and manipulating data from MySQL by following ORM principle.
- Developed code using various latest Java features like Lambda expression,Functional Interfaces and Streams.
- Worked extensively on Java Collections such as Sets, Lists etc for storing and manipulating data.
- Developed the application by dividing it into layers such as Persistence, Service and Presentation. Also used Spring AOP concepts for implementing cross cutting concerns which are common to all layers.
- Resolved various bugs which occured during the testing process.
- Got to know how various tools like Qradar and ServiceNow works.
- Worked closely with the UI team to understand the requirement of data from the backend.

PERSONAL PROJECTS

1) Exam Registration System for Ex-Students.
- Developed for helping the college department in maintaining the records of Ex-Students. It helps in tracking record of paid and unpaid students and generating Admit cards and Rasa form.

2) WanderLust Application.
- Developed during Infosys training program . It is an international travel package booking application. Users can view all the available packages and book them.
