Communications Engineering
Sri Venkateswara College of Engineering And Techno, Chittoor, India

KEY RESPONSIBILITES

Module Leadership: As a Salesforce Module Lead I played a key role in the successful design, development, and implementation of Salesforce solutions for our organization.
Development and Configuration: Design, develop, and configure Salesforce modules based on business requirements. Implement best practices for customizations, including Apex, Visualforce, Lightning components, and data integrations. Ensure the modules are scalable, efficient, and compliant with security and data governance standards.
Module Maintenance: Monitor and maintain the health of assigned Salesforce modules, addressing issues and enhancements as needed. Proactively identify opportunities for process improvements, automation, and optimization.
Stakeholder Collaboration: Collaborate with business stakeholders to understand their requirements and translate them into effective Salesforce solutions. Communicate module status, progress, and challenges to project management and stakeholders.

Quality Assurance: Establish and enforce coding and configuration standards to maintain the quality of code and customizations. Perform code reviews to ensure high-quality Salesforce module development.
