Note : No current ongoing project at the moment

I work as a contract Tableau Developer where I ;

- Develop BI dashboards
- Utilize Salesforce to get all the customer data in one place and also track customer journey and improvement.
- Translate business needs from a non-technical level including massive data sheets to generating visualization reports
- Develop advanced queries and stored procedures to generate data reports
- Make use of SharePoint to build websites resulting from visualization dashboard so as to share documents and information with colleagues and partners.
- Design, develop and test tableau scripts and tableau dashboards to meet customer requirements
- Work with other business intelligence team and end users within the organization to help troubleshoot issues they might be having with dashboards.
- Performed front line help desk assistance for application issues.
- Design commission, licensing & contracting documents for stakeholders and partners

- Managed department IT projects from inception, including specifications, testing, implementation, and modifications.
- Coordinated multiple business groups for user acceptance testing.
- Interacted with the client to understand and analyze the requirements through calls or in-person.
- Documented business processes and analysed procedures to see that they would meet changing business needs.

**University of Delaware**, Newark, Delaware USA  
*Tableau Developer*

04/2017 - 05/2020

- Administered user, user groups, and scheduled instances for reports in Tableau.
- Formulated tableau dashboards by utilizing stack bars, bar graph, tree maps, heat maps, scattered plots, and geographical maps to address problems
- Developed reports, KPIs and Dashboards that meet the business reporting needs and presenting it in a matter that provides clarity of meaning and drives decisions.
- Analyzed data using Excel, Power BI, and insurance systems to determine reporting errors and general inconsistencies

**Total Nigeria Plc**, Lagos, Lagos State Nigeria  
*Jnr Tableau Developer*

04/2015 - 03/2017

- Reviewed and validated customer data as it was being collected
- Developed reports, KPIs and Dashboards that meet the business reporting needs and presenting it in a matter that provides clarity of meaning and drives decisions.
- Analyzed data using Excel, Power BI, and insurance systems to determine reporting errors and general inconsistencies
- Monitored analytics and metrics results
- Performed data profiling to identify and understand anomalies
