

Summary

- ❖ Having a Permanent Residence in Belgium with D type card which allows working in all the European countries including Switzerland.
- ❖ Preparing for FRM certification.
- ❖ Banking Techno-functional consultant with more than 10 years of experience in Banking, Finance and Information Technology.
- ❖ Having experience as Business Analyst for 2 years in Finance and Reporting.
- ❖ Experience in understanding BASEL reports like LCR, NSFR and Monitoring Metrics etc.,
- ❖ Highly expertise in handling BASEL project E2E cycle.
- ❖ Experience in Project Management for Oracle Government Financial Reporting System.
- ❖ Worked at client site in Belgium for implementation of end to end LRM and FTP solutions.
- ❖ Having 9 years of experience in banking domain and worked for **ING, USAA, TIAA etc.,**
- ❖ Lead Technical Architect and Consulting design approaches for OFSAA solution implementations, upgrade and migrations.
- ❖ Analyzing with other functional guys in different patterns and trends to propose the best fit to meet the business requirements and as per the regulatory board and technology roadmap.
- ❖ Provide consulting support to business units, platform owners in identifying and implementing effective solution.
- ❖ Strong working knowledge in Data Modeling and Developed Technical designs for the OFSAA solutions.
- ❖ Implementation of Oracle Financial Services Data Foundation for major global banking clients ING, USAA.
- ❖ Rich knowledge in OFSAA Infrastructure installation, maintenance, upgrade, patching, migration etc.,
- ❖ 8+ years of experience in various Oracle Products (OFSAA/AML) suite across the globe with various Tier I and Tier II banks.
- ❖ Working closely with Business users to convert Business requirements into Functional and Technical specification.
- ❖ Managed the team of consultants with quality delivery and high customer satisfaction, and provided career guidance and mentoring.
- ❖ Strong knowledge in Dimension management and data movement in OFSAA.
- ❖ Managed the evaluation of ETL and OLAP tools and recommended the most suitable solutions for business needs.
- ❖ Holding Permanent Residence for Belgium.

Products/Areas of Expertise

- Basel III-Liquidity-Functional Analysis
- OFSAA (BASEL, FSDF)LRM/ AML/FTP/PFT.
- OFSAAI 7.3.5 and 8.0.2
- Oracle Apps(ERP)
- Rich knowledge in PL/SQL Developer
- SQL Performance Tuning.

Technical Summary

- **Process:-** SNOW, HPALM.
- **Database:-** Oracle, Postgresql.
- **Deployment:-** GIT, Artifactory.
- **Data Modeling & ETL:-** Erwin, ODI.
- **Business Reporting:** OBIEE.
- **Programming Technologies:-** Java/J2ee.

Experience Summary

S.No	Company	From	To
1	Axis Bank	Mar 2021	Till date
2	Cognizant Technologies Solutions	Apr 2017	Feb2021
3	HCL Technologies	Jun 2016	Mar 2017
4	Infosys Technologies Limited	Mar 2013	Jun 2016
5	Tata consultancy Services	Mar 2010	Mar 2013

Current Assignment

Company	: Axis Bank	Mumbai, India
Project Name	: Information Technology – Risk & Performance mgmt.	Mar 2021 – Till date
Role	: Assistant Vice President	
Role	: IT Risk Lead – Business Data Analyst	
Software	: OFSAI , OFSAA LRM(BASEL-III), OFSAA FTP/PFT, Oracle PL-SQL , UNIX, Oracle 12g, Raroc, Tableau	
Hardware	: Windows, EXA DB, Linux.	

Description of the project :

The implementation of ERM & EPM solution as per regulations for Axis Bank for all the entities including overseas. The goal of the project to provide entire solution as one Axis from sourcing till reporting which calculates Net Interest Income for the entire Bank.

The project also includes the migration of OFSAA 7.3.5 to 8.1 for the compliance and analyzing and reconciling business reports by Tableau.

Responsibility :

- Working with stake holders to understand Business requirement to create functional and technical design.
- As IT Risk lead, taking the full responsibility for the implementation based on the BRD.
- Creating and managing vendor agreements between the Axis bank and the Service provider
- Performing Pentest and resolving the issues based on the result of Pentest and doing audit reports for the compliance
- Analyze Liquidity reports(LCR,NSFR etc.,) and help business to adjustments.
- Having rich knowledge on end to end implementation as I am performing a role of Business/Functional and Technical Lead in Datawarehouse environment
- (LRM and FTP) Implementation includes configuration, ETL, Metadata preparation (Business Metadata and Technical Metadata) and support activities.
- Rich experience in PL/SQL (complex Procedures and Functions) and performance tuning.
- Helping business for designing and data modeling of the requirements.
- Managing and assigning technical works to the Team members.
- Technical/Table design for all kind of technical activities.
- Very good knowledge in Liquidity calculations like LCR, NSFR and Monitoring tools.
- Expertise in batch scheduling, PR2 and ICC framework.
- Installation, maintenance and upgrade activities on OFSAA 7.3.5 and OFSAA 802 environments.
- Supporting live production issues and managing framework activities.

Previous Experiences:

Company : Cognizant Technologies **Brussels, Belgium**
Client : ING Belgium SA **Apr 2017 – Feb 2021**
Project Name : OFSAA Bank Wide Liquidity/Finance & Reporting
Role : Business Analyst/Techno-Functional analyst
Software : OFSAAI , OFSAA LRM(BASEL-III), OFSAA FTP, Oracle PL-SQL , UNIX, Oracle 12g, OBIEE, Agile Reporter
Hardware : Windows, EXA DB, Linux.

Description of the project :

The implementation of Liquidity risk reporting as per BASEL for ING Bank for all the entities. The goal of the project to provide one sourcing and one reporting concept for all the underlying entities of ING Bank which called as Bank wide liquidity.

The project mainly on OFSAAI migration from 802 to 806 and end to end reporting solution for US Re-Banking apart from Bank wide liquidity.

OFSAA ERM and EPM application like LRM, FTP, GL Reconciliation solutions are used. OBIEE and Agile reporters are used as reporting tools respectively for European and US regulatory reporting.

Responsibility :

- Working with stake holders to create Business requirement as well as the functional documents for technical people to implement the change.
- Analyze Liquidity reports(LCR,NSFR etc.,) and help business to adjustments.
- Analyze Balance Sheet reports and Reconciliation based on the positions.
- Working as a bridge between business/end user and IT/implementation team for the smooth and correct delivery of the project as per planning
- Having rich knowledge on end to end implementation as I am performing a role of Business/Functional and Technical Lead in Datawarehouse environment
- Leading Liquidity project from ING Belgium for all Technical activities and assigning the works to the team members.
- Highly expertise in OFSAA (LRM and FTP) Implementation includes configuration, ETL, Metadata preparation (Business Metadata and Technical Metadata) and support activities.
- Rich experience in PL/SQL (complex Procedures and Functions) and performance tuning.
- Helping business for designing and data modeling of the requirements.
- Managing and assigning technical works to the Team members.
- Designing migration planning from existing OFSAA 802 to 806.
- Technical/Table design for all kind of technical activities.
- Very good knowledge in Liquidity calculations like LCR, NSFR and Monitoring tools.
- Expertise in batch scheduling, PR2 and ICC framework.
- Installation, maintenance and upgrade activities on OFSAA 7.3.5 and OFSAA 802 environments.
- Supporting live production issues and managing framework activities.

Company : HCL Technologies **Chennai**
Client : USAA **Jul 2016 – Mar 2017**
Project Name : OFSAA Enterprise Performance Management
Role : Technical Lead

Software : OFSAA (Oracle Financial Services Analytical Application) , OFSAA FSDF, OFSAA FTP/PFT, Oracle PL-SQL , UNIX, Oracle 12g, SQL Developer
Hardware : Windows, AIX, EXA, Linux.

Description of the project :

USAA is a diversified financial services group of companies and its subsidiaries offering banking, investing and insurance to people and families the serve or served, in the United States Military.

The project involves implementing and enhancing Enterprise Performance Management on Oracle Financial Services Analytical Applications (OFSAA). The modules are Profitability Management(PFT) and Fund Transfer Pricing (FTP).

The objective of the project is to upgrade existing OFSAA4.5 to OFSAA8 and implement, customize Profitability and Fund Transfer Pricing modules. It involves integration of ODI into OFSAA using OFS Data Integration Hub application pack.

Responsibility :

- Successfully installed OFSAA 8.0 with profitability pack
- Rich experience in applying OFSAA patches and service maintenance
- Successfully installed OFSDI pack and have done an end to end integration of OFSDIH with Oracle Data Integrator tool.
- Expertise in batch scheduling, PR2 and ICC framework
- Expertise in Data migration as well as Data warehouse projects
- Hands on experience in OFSAA performance handling and tuning.
- Experience on FTP process tuning.
- Highly expertise in OFSAA (PFT and FTP) Implementation includes configuration, ETL(T2T, F2T), Metadata preparation (Business Metadata and Technical Metadata) and support activities.
- Rich experience in PL/SQL (complex Procedures and Functions).
- Performance tuning and optimization of PL/SQL queries.
- Product Implementation / Integration, business and system requirement sessions participation for technical analysis and interaction with client to facilitate smooth implementation.
- Working in Agile methodology.

Company	: Infosys Technologies Limited	Brussels, Belgium
Client	: ING Belgium SA	Mar 2013 – Jun 2016
Project Name	: OFSAA Finance Transformation Program	
Role	: Technology Lead	
Software	: OFSAA (Oracle Financial Services Analytical Application) , OFSAA FSDF, OFSAA BASEL, Oracle PL-SQL , UNIX, Oracle 11g, OBIEE, SQL Developer	
Hardware	: Unix, Linux OS, Websphere, Weblogic, Oracle DB , AIX, EXA.	

Description of the project :

The project involves implementing financial transformation program on Oracle Financial Services Analytical Applications (OFSAA) in the place of ING legacy systems. The modules are Liquidity Risk Management (LRM), Fund Transfer Pricing (FTP), and Asset Liability Management (ALM).

The objective of the project is to calculate BASEL III Liquidity ratios like LCR, NSFR and other concentration ratios using OFSAA and OBIEE. The source data has been processed into OFSAA LRM engine after data quality checks. The rules, assumptions are applied on the processed data in LRM engine based on the business

requirement and ratios will be calculated and stored into reporting tables. Reports are made in OBIEE on those reporting tables and end user can able to see and analysis can be made.

Responsibility :

- Managing and assigning technical works to the Team members.
- Expertise in batch scheduling, PR2 and ICC framework
- Expertise in Data migration as well as Data warehouse projects
- Hands on experience in OFSAA performance handling and tuning.
- Highly expertise in OFSAA (LRM and FTP) Implementation includes configuration, ETL, Metadata preparation (Business Metadata and Technical Metadata) and support activities.
- Rich experience in PL/SQL (complex Procedures and Functions).
- Expertise in End to End Technical implementation.
- Involved in OFSAA DB migration from AIX to EXA.
- Baseline and Release management (Preparing object list and run book for deployment. Successfully done for 4 major release like LCR, NSFR, Monitoring Tools and Delegated Acts and more than 30 delta releases).
- Performance tuning and optimization of PL/SQL queries.
- Product Implementation / Integration, business and system requirement sessions participation for technical analysis and interaction with client to facilitate smooth implementation.
- Trained and working in Agile methodology.

Company/Client :	TCS Internal – Corporate Finance	Mumbai
Project Name :	Global Repository Of Scanned Storage	Oct 2010 – Mar 2013
Role :	Developer	
Software :	Oracle Apps Finance, Oracle 11g, Pl Sql, JSF, OFSAAI	

Description of the project :

GROSS is a web-based application designed in Java JSF with Oracle DB and storing financial documents using Customized Alfresco.

This application used for creating, validating, payments for the invoices and maintaining financial invoice documents in a repository(Alfresco).

Working on Oracle Personalization. Creating JSPs and calling it from Oracle Apps forms. Center of Excellence for OFSAAI solutions.

Responsibility :

- Taken ownership of DB, working on development and maintenance of DB using Pl Sql queries.
- Hands on in pl sql development for writing Packages, Procedures, Functions, Mat Views, JOB, performance query tuning etc.,
- Good Functional Knowledge in Oracle Apps(Finance Module), customization and personalization, Creating custom JSP pages and calling it through Oracle Apps. Deployment and maintenance of Oracle Apps using SSH client.
- Very good knowledge in creating web pages using JSF.
- Involved in the COE of OFSAA for LRM and FTP solutions. Installation, maintenance and implementation of BASEL.

Company/Client : TCS Internal – Corporate Finance
Project Name : TCS - Consolidation
Role : Oracle Technical Consultant
Software : Oracle Apps Finance, Oracle 11g, PL/SQL

Mumbai
Mar 2010 – Oct 2010

Description of the project :

Consolidation is a finance based project and providing solutions for financial modules like Account Payables, Account Receivables, General Ledger, Project Accounting etc., using Oracle Application and development, customization in oracle forms and oracle reports.

Working on Oracle Personalization.

Creating JSPs and calling it from Oracle Apps forms.

Responsibility :

- Worked in oracle application for all mentioned financial modules.
- Worked as Pl Sql developer to tune queries and writing queries for the oracle reports etc.,
- Code deployment and maintenance of Oracle Apps using SSH.
- Personalization in forms and creating and calling JSPs from oracle forms.
