WORK EXPERIENCE

Full Stack Developer

Cognizant

📅 March 2019   📍 Bangalore, India

Protocol Creator software service provides a digital platform to help you create, re-use and review content of different document types, and to publish the content as a traditional document or a machine-readable structured file.

- Developed UI components using ReactJS and Redux.
- Worked in NodeJS (Express) to build the API.
- Used Sequelize ORM to manage relational database and maintain its data.
- Developed unit test cases using chai, mocha, sinonJs.

Front End Developer

Cognizant

📅 Aug 2018   📍 Bangalore, India

The Cognizant Lab Insights product helps connect together laboratory systems, in- struments, and processes to improve and speed up the way new pharmaceutical drugs are developed.

- Developed various UI components using Angular 6/8 and angular materials, and used angular lazy loading concepts and angular directive.
- Experience in creating the responsive website using responsive design, CSS Flex box, Bootstrap and media queries.
- Test-driven development with Jasmine and karma for unit-testing and code.
- Collaborated with designers to meet customer expectations.
