Major Project

STOCK TRADING	It is a solution for the old trend of **Share trading** which was time consuming and slow. This system provides a way to the customer to buy and sell stocks at real time, hence improving his portfolio.
ONLINE INSURANCE	The Internet has the potential to significantly reduce search cost by allowing consumer to engage in low-cost price comparisons **ONLINE**. This paper provides empirical evidence on the impact that the rise of Internet comparisons shopping site has had for the prices of life insurance in the 1990s.
EMPLOYEE MANAGEMENT	One foremost officially problem is of data storage it requires a lot of stationary. Storage space so many other things. As computer technology progresses this problem is solved up to some extent. In order to minimize the catalogue system and to automate the system using computer technology this project is designed. It was our Minor Project

Activity participation

1. I had participated in Competition to test Career Awareness Level of B.E and Secured 93.81%.
