## Work History

10/2023 - Current
**Senior Software Engineer**
*Happiest Minds Technologies*, Bengaluru, India
FOREVER NEW CLOTHING:
**Forever new invoice processing**
When the user attach invoice from the Mail/App and sent, where you can upload either a stock or general invoice.

Then the Main Extraction flow is triggered, it dynamically identifies the Vendor name and initiates the specific Vendor flow. If the Vendor is of type "Stock," extraction occurs, and the invoice is created in the Invoice Master list. And the extracted data will be created in the Invoice 3-way mapping list.

If the Vendor is of type "General," extraction occurs, and the invoice is created in the Invoice Master list. Subsequently, the data is created in the Invoice Coding list.

Once the invoice is uploaded in the SharePoint, you can view it in the app and start the validation the invoice proceed with reviewing/approving for the general invoice. if it is stock they can validate/edit rate and price variance in three way mapping. once they validated they can post the invoice to the net-suite.

**Roles & Responsibilities:**

- Created the SharePoint lists.

- Trained the AI model for extracting the data

- Stored the date to the sharepoint with PowerAutomate flows

- Developed the powerApps application to start invoice processing.
- Deployed the solution to other environments.

06/2020 - 09/2023
**Professional 1 Emerging Practices**
*DXC Technology*, **Chennai**
DXC Technology
