#### **Work Experience:**

- **Current Employer: RIGHTPOINT INDIA DIGITAL PRIVATE LIMITED , Jaipur ( Nov'18 -present ) as (Sr Quality Analyst)**
- **Previous Employer: Techno Software's solutions , Jaipur ( FEB '16- OCT 2018 )**
- Currently Working as Sr Quality Analyst on **HIS Sitecore (CMS) and HFE Sitecore and Sitecore Commerce (CMS) Project**

- Worked as Software Quality Analyst on the project **BMW Dealer Portal and Millennium ERP**
- **PROJECTS UNDERTAKEN:**
- **Project Title: HFE Sitecore and Sitecore Commerce** (In this we create more streamlined commerce experience for Herschend Family Entertainment properties. By bringing commerce and content together in a single system we improve consistency, provide a clearer value proposition, and drive an increase in order size through the digital channel.
- **Project Title: Millennia ERP** (Millennia ERP have multiple application which are Project management, Marketing automation and Quotation management).
- **Project Management: Project Management Application under Millennia** is a task management application that helps an organization to manage multiple projects under multiple teams under one hood. It provides a visual overview of what is being worked on, who has worked or working on it. The system has been developed in such a way that it helps an organization to keep things organized and helps to maintain the flexibility too.
- **Marketing Automation: Marketing Automation Application under Millennia** is an email/campaign marketing application that helps an organization to create lists, campaigns, templates and run the campaign management. It helps to send multiple emails and run many campaigns at single point of time. The system has been developed in such a way that it helps an organization to run different campaigns at single point of time. Subscribed users or the users in the lists will receive campaign emails. System can also analyze the Open rate and the Click through rate. Whenever a user will open the email sent by your system for campaigning, then the open rate will be increased. Once a user clicks on a button on the email template, which will redirect the user to the site then the click rate will get increased too. It will help the organization to understand the effectiveness/engagement of a program.
- **Quotation Management: In Quotation management** NSC user can create quotation as per their requirement, while creating the quotation NSC will mention the entire requested product, if NSC doesn't have that product then they will added suggested product in it. Once the quotation is sent to dealer then they will receives an email where a pdf is attached regarding the quotation that they need. If they agree with that requirement then that dealer will have an option to approve the Quotation. Once they approved then Sales order form will get generate for that quotation. If Dealer is not satisfied with that quotation then also he has an option to reject that quotation. Now has an option to edit that quotation and they will resent it to dealer again.

- **Project Title: BMW Dealer Portal** (Dealer Portal MY is a Web Application for communication and Data Exchange between BMW NSC Malaysia and BMW Dealer network in Malaysia).
- In **BMW Dealer Portal** there are multiple modules which are as follow :-
- **Administrator:** In this Module user manages all User access permission, company, Branch creation and updation. From here NSC user is able to create Model details etc.
- **Marketing:** In this Module NSC user is able to create the library category for the BMW items also add the new items for the dealer in different categories. In this module Dealer and NSC user can create event on different occasions. Also Dealer can place the order for those items similar to Ecommerce websites.
- **COR:** This is cost of retail module through dealer can submit the claims on the behalf of their customer for extra benefits under different program which is created by NSC member of BMW. For these claim BMW have four level of approval process through which claim will get approved and reject and every time dealer will be notify via system notification and email.
- **Sales:** In this Module dealer create sales and warranty of the cars under different purchase type like New, Demo, Used, BSI etc. Also in this module monthly sales report will be created and maintained by the dealers.
- **Aftersales:** In this Module six sub modules are present which are (SKD Form, Goodwill Request, Credit limit, Blocked orders, Technical campaign, Special Tools).Under SKD form dealer will raise the complain for a chassis on the behalf of the end customer. It has approval level also.Under Goodwill dealer will submitted their requested in our system where it has auto approval and multi level approval process.
- In Technical campaign NSC person create the campaign and list those chassis under this campaign which has some problem in it. Under this module NSC call those cars chassis which has some problem in it. Once the problem is rectified then those chassis is released again to their dealer
