## PROFESSIONAL SUMMARY

A highly technical, 9x certified Salesforce developer with 6.8 years of extensive experience in SFDC configuration, customization, Lightning Aura Components, Integration & Lightning Web Components(LWC). I have the proven knowledge and skills required for developing strategies for continuous improvements that drive products to success. Also, I worked as a Leader & Career Mentor for many Resources. I have experience in handling clients Independently as well. My past assignments include configuring & Customizing Salesforce Sales, Service & Experience Cloud. Fair ability to analyze, design, and optimize business processes with hands-on experience implementing change, increasing user adoption, and driving best practices.

## EXPERIENCE

### Senior Software Engineer | Globant

Apr 2021 – Present

Pune, India

- Working as a senior Backend & Frontend developer.
- Working extensively in Apex code customization where I am working on Apex, Triggers & Test classes along with asynchronous apex like Batch apex, Scheduler & Queueable.
- Built LWC Components as per the business requirement..
- Worked on multiple modules and applications parallelly.
- Worked on a community builder where I set up a community from scratch and built forms and pages. I have also utilized the component functionality where I have added custom LWC components and standard components on newly created pages.
- Worked on configuring the community page settings, themes & content layouts.
- Worked on community login & Registration page setup.
- Worked on Rest Api's to get the data from a third-party system to Salesforce.
- Working on Agile Methodology and using Azure DevOps.
- Deployed data & Metadata using GIT Repositories. Used Source-Tree and VS Code to commit & push the changes.
- A leading Salesforce Technical Interview Panelist at Globant.
- Working as a Career Leader & Mentor and currently handling few resources under me.

### Cloud Developer II | Honeywell Technology Solutions

Jun 2020 – Apr 2021

Bangalore, India

- Assisted in an internal Salesforce Audit by identifying the various permissions given to Users/Profiles/Permission Sets and documenting/analyzing the data in Microsoft Excel.
- Part of a Reorganization project which involved identifying and analyzing specific data values within an SFDC org and determining and performing the changes required to the data/metadata. Made use of Visual Studio Code.

Associate

Flosum Certified

Copado Certified

TCS Awards for Excellence

TCS On The Spot Award 18

TCS On The Spot Award 19

TCS On-Time Del Award Jan20

- Successfully Integrate SFDC with SAP Hybris system for Order creation.
- Did the complete enhancement of the project. Resolved all the apex classes & triggers which were not written as per Salesforce best practices.
- Did the analysis of all the Apex code, triggers, validation rules, workflow rules, process builders, flows & test classes, and made those error-free.
- Worked on test classes to meet the code coverage criteria.
- Used Local + Main Flosum tool for deployment across SFDC Sandboxes.

## System Engineer | Tata Consultancy Services

📅 Dec 2016 – May 2020

📍 Bangalore, India

- Worked on various Salesforce.com customizations – standard objects.
- Designed, and developed the Custom objects, Validation rules, Page layouts, Custom tabs, Components, and Visualforce Pages to suit the needs of the application.
- Created different Workflow rules, Process Builder, Page Layout, and assigned different layouts based on Record Types.
- Manage security, users, roles, profiles, groups, queues, sharing rules, and other setup options.
- Created custom settings for related objects for field tracking history. Also used Data Loader to store data into the database.
- Develop reports, dashboards, and processes continuously monitor data quality and integrity.
- Imported data by mapping to business objects in the CRM system using the Import/Export wizard.
- Implemented picklists, dependent picklists, lookups, validation, and formula fields to the custom objects.
- Used Tabular, Summary, and Matrix reports to create Standard Reports and Custom reports.
- Developed and configured various Reports for different user profiles based on the needs of the organization.
- Involved in coding for modules for all the Sub-Application of the CRM application which involves extending existing SFDC standard components using Apex, Visualforce, and other utilities.
- Designed, developed, and deployed Apex Classes, Apex Test Classes, Controller Classes, and Apex Trigger packages for various functional needs in the application.
- Added and Created Lightning Components. Worked closely with BAs for new lightning component features and enhancements in lightning.
- Worked on REST Integration & API.
