Prasad Thombre
Senior Software Engineer
7972522590
prasadthombre8@gmail.com

- 4 years of competitive experience in the IT industry using
- JavaScript, TypeScript, Angular, RxJS ,C#, .NET Core,Entitiy Framework, Angular Material HTML5, CSS3, Bootstrap.
- Strong background in building responsive and user-friendly web interfaces, managing state, and integrating APIs.
- Experienced Angular developer is passionate about buildingdynamic and responsive web applications with custom components and hooks.
- Create .Net Core web API with C# v.6 Entity Framework.
- Developed proficiency in building scalable and maintainable code using Angular, C#, and other modern front-end technologies

Skills

Primary Skills

Angular 8+ 4.0 Years Advanced
(C#).Net core 3.5 Years Advanced
JavaScript 3.0 Years Advanced
TypeScript 4.0 Years Advanced
HTML   3.0 Years Advanced
CSS   2.0 Years   Intermediate

Secondary Skills

Angular 15,.net core 6 ,web API ,DevOps, Basic Auth, Bitbucket, Bootstrap, ESLint, Git, Github, Gitlab, JIRA, C#, .NET Core,Entitiy Framework, Sass, Windows,npm,yarn,MS Office,SQL Server.

Experience

Harbinger Systems Pvt Ltd/ Senior Software Engineer
May 2022 - Jan 2024 , Pune

Intivion Technology Pvt Ltd/ Sofware Engineer
Jan 2020 - May 2022, Pune

Projects

Fire Safety   Team Size: 18
Project description : Purpose and focus of your fire safety equipment selling.

- Development, and maintenance of complex Angular-based web applications.
- Weekly Stand-up calls with US based client, explaining developed functionalities, understanding complex bugs, plans and tasks.
- Fixing of Bugs, listed down in the ticketing-system on a regular basis
- Create reusable components, services, and modules to ensure code maintainability and scalability.
- Optimize application performance, including reducing load times and improving user experience.
- Stay up to date with the latest Angular updates, trends, and best practices.
- Develop inventory management functionalities to track andreal-time analytics and

- Develop and execute unit tests, integration tests, and end-to-end tests to ensure code reliability.
- Evaluate and recommend new tools, libraries, and technologies that can enhance development processes.
- Share knowledge and promote best practices within the development team..
- Implemented unit tests and conducted end-to-end testing to ensure the application's reliability and adherence to requirements.
- Collaborated with designers and front-end developers to ensure a visually appealing and user-friendly interface.

Skills: DevOps| C# | Github | Bitbucket | Angular 13 | .Net Core web API | Bootstrap | npm | TypeScript | JavaScript | HTML | CSS | Angular Material |.NET Core | Entitiy Framework

Duration: 1 Year(s) 8 Month(s)

Agriculture Domain   Team Size: 8

Project description : Develop a website or online presence that shares information, resources, or products related to farming, depending on your goals and interests within the industry.

- Develop a Agriculture management web application using Angular 10 and TypeScript.
- Development and maintenance of Farming system.
- Implement HTML and CSS to create an intuitive and visually appealing user interface.
- Use Jasmin Karma as the testing framework to write unit tests forcomponents, ensuring code quality and reliability.
- Implement caching strategies and other performance optimizations.
- Provide a secure login system for leads to access their personalized information. Create a user-friendly interface for leads to view and edit their provided information.
- Implement responsive design to ensure the application is accessible on various devices and screen sizes.
- Utilize Angular Router for navigation within the application,allowing leads to easily move between different sections.
- Implement validation checks to ensure the accuracy and integrity of the lead information.
- Optimize the application's performance to provide a smooth and seamless user experience.
- Apply modern design patterns and best practices for maintainable and scalable code.

Skills: JIRA | Bitbucket | Jasmin Karma | Angular 10 | Bootstrap | | npm | C# | .NET Core | Web API |
|yarn | Sass | TypeScript | .NET Core | Entitiy Framework

Duration: 1 Year(s) 0 Month(s)

ClientZone Crm Tool   Team Size: 3

Project Description

- Developed a web-based Trader's Room using React and Redux Toolkit.
- Implemented secure login functionality for traders to access their accounts.
- Traders can create multiple trading accounts within the Trader's Room.
- Provided a transaction history feature for traders to view their past trading activities.
- Implemented real-time notifications to alert traders about important activities.
- Enabled secure deposit functionality for traders to fund their trading accounts.
- Implemented a withdrawal request feature for traders to request fund withdrawals.
- Designed with the specific requirements of forex traders in mind. Ensured the Trader's Room provides a secure and user-friendly experience for traders.

Skills: JIRA | Basic Auth | Github | C# | .NET Core | Web API | Bootstrap | npm | Bootstrap | Entity Framework| ESLint | TypeScript | JavaScript | Windows |Linux | HTML | CSS | Redux |GitHub

Duration: 0 Year(s) 6 Month(s)

- Develop CRM (Customer Relationship Management) system exclusively for FX Brokerages and Financial organizations.
- Utilize React and Redux-Toolkit for front-end development.
- Focus on maximizing FTDs (First-Time Deposits) and retention by enabling proactive engagement with clients.
- Ensure comprehensive tracking of client interactions and activities.
- Integrate with multiple trading platforms such as MT4, cTrader, XOH, Sirix, etc.
- Implement the Single Wallet concept to integrate a single customer profile with multiple trading platforms and accounts. Account for different workflows and requirements of various brokers in the system's design and functionality.
- Aim for reliability and robustness in system performance.
- Provide a comprehensive solution that meets the specific needs of FX Brokerages and Financial organizations.

Skills: JIRA | Github | React.js | Chart.js | npm | Bootstrap | Prettier | TypeScript | JavaScript | Windows | Linux | HTML | CSS | Redux
