Salesforce Training:
Description: Step by step knowledge transfer given by trainer from creating an object to creating an application.

Roles and Responsibility:
- Sole responsibility to complete the tasks given by trainer daily with the help of trailhead.

Vaccination Portal:
Description: This is a project which was given to us on this current pandemic vaccination scenario for creating an application on salesforce platform for booking vaccination slots with the help of COWIN API's.
Team Size: 3
Roles and Responsibilities:
- I have developed an interface where citizen will be able to search the vaccination centers by pin code and district.
- Integrated COWIN's API for getting the latest available vaccination slot data as per the citizen's input.
- Gave various filters i.e. type of vaccine, age etc as well for easy searching in the result set.
- Created a power point presentation as well for the complete integrated application.

Currently working on integrating salesforce database in vaccination portal so that going forward we will not be directly calling COWIN API's.
