PROJECT# 5: Client: Nucleus commercial Finance, UK

(Jan 2018 – Sept 2018)

Title: Business Process Automation.

Admin, Development, CPQ & Sales force Lightning.

Role: Sales Force Application Developer

Languages & Data base: Apex, HTML, CSS, JavaScript, Data Base, SOQL & SOSL.

Tools: Eclipse, Data Loader & Salesforce CPQ.

Project Description:

Nucleus is a money lending website, where it will give loans to customers on various areas keeping property as assurance. In order to provide loans fast, it would be helpful if integrated with mouse price.

Based on the property valuation it can be easy for nucleus to filter up to what amount it can provide as a loan.

Price is a website, where user needs to enter address of a particular property in UK, it will provide the

Value range, valuation, rental estimate, rental range, tenure, type, year built ...etc of that particular property.

Role & Responsibilities:

- Worked closely with sales, **Operational team and business analysts** and performed detailed analysis for business technical requirements and designed the solution by customizing various standard objects of Salesforce.com (SFDC).
- Having good knowledge of **Salesforce/Steelbrick** CPQ objects used in Quote to Order process especially.
- CPQ's **benefits** also extend to operational efficiencies. it shortens the time-to-market for new offerings, decreases seller ramp time, automates complex back-office sales processes in the front-office, and reduces costly pricing errors.
- **Land Registry Integration (SOAP)** on **Home Owner verification (HOV)**, moving the Land Registry and Property Valuation integrations to the beginning of the deal processing will allow us to filter out deals that are not true home owners verified by Land Registry.
- Moving manual and auto **multiple attachments** from Lead to opportunity and respective credit write up based on opportunity product of interest are moved automatically.
