- Creating test cases and regression test suites for a variety of applications

ABILITIES/SKILLS

Languages	: Java
Automation Tools	: Selenium
Performance Tool	: Jmeter
Bug Reporting Tools	: Jira
Database	: SQL
Operating Systems	: Windows

ACADEMIC DETAILS

B. TECH from Geethanjali institute of science and technology from 2013-2017 with 72%

LIST OF CLIENTS I HAVE WORKED FOR:

Project #1

Project Name : MyGate
Client : Nineleaps
Testing Method : Manual, Regression
Environment : Agile methodology
Duration : Dec'2020 to till Date

Project description: An app that simplifies life for everyone in a gated community, from residents and management committee members to security guards and facility managers. Packed with features, it reduces many hassles—authorising entry of delivery executives, paying maintenance bills, raising a ticket to the facility manager—to a single click.

Responsibilities:

- Handling the project alone, as I'm the only tester in the Project from the start.
- Understanding the Requirements and Functional Specifications of the Application.
- Carried out Sanity Testing, Functional, Integration, load testing and Regression Testing.
- Responsible for creating, running test cases, and posting defects.
- Execute tests, evaluate results and report them correctly.
- Involved in daily scrum meetings to discuss daily progress in the project.
- Participated in a Sprint Planning meeting to identify Sprint Backlog.
- Participated in smoke testing to know Test readiness

Project #2

Project Name : Advantage
Client : Wadhwani Foundation
Testing Method : Manual , Selenium using protractor
Tool Used : Jira, Testrail
Environment : Agile methodology
Duration : July' 2018 to Dec'2020

Project description:Wadhwani Advantage helps Start-ups and Small businesses accelerate their growth by providing personalised, on-demand knowledge and curated advisory, consulting resources through an AI-enabled mobile platform.

Responsibilities:

- Handling the project alone, as I'm the only tester in the Project from the start.
- Understanding the Requirements and Functional Specifications of the Application.
- Carried out Sanity Testing, Functional, Integration and Regression Testing.
- Done the API testing using postman
- Responsible for creating, running test cases, and posting defects.
- Execute tests, evaluate results and report them correctly.
- Involved in daily scrum meetings to discuss daily progress in the project.
- Participated in a Sprint Planning meeting to identify Sprint Backlog.
- Participated in smoke testing to know Test readiness.
- Automation for application from the scratch
- Creating and executing Data Driven tests, GUI Validations, Checking database content.
- Done the feasibility analysis of test cases, which need to be automated.

AWARDS & APPRECIATIONS :

- **SPOLIGHT -2020** in Annual awards for 2020-2021
- **FEATHER ON HAT** for the month of November-2020
- **FEATHER ON HAT** for the month of March -2020

DECLARATION:

I here by declare that all the information stated above is true to the best of my knowledge and belief .
