EXPERIENCE

SALESFORCE.COM | Salesforce developer

December 2021 - Still Going | Hyderabad, India

- Worked on the Salesforce Platform, where I help developers from other companies to find solutions to their business cases. By helping developers from other companies across the globe, I am able to master the Salesforce platform concepts in deep and enhance my problem-solving skills
- Assist 3rd -party developers to troubleshoot their integration with salesforce.com APIs and implementation of other Salesforce.com Products
- Work with the Front-End Web Developers using Modern JavaScript, Visualforce pages, HTML5, CSS, Lightning Experience- LWC & Aura, Einstein Analytics, Lightning Flows, etc.
- This involves debugging, troubleshooting and owning responsibility to see that the issue is fully resolved Provide feature explanation and coding best practices.
- For the Backend concepts, I worked on Apex (Synchronous and Asynchronous), helped in API debugging of REST, SOAP and bulk API. Also worked on deployment using Salesforce CLI & Github.
- Here I Developed & Debugged Single Sign on (SSOs) for Salesforce Orgs using SAML and OAuth 2.0
- Working on a core Product company got the develop the unique salesforce product for scratch doing integration with almost every application for every customer across the globe.

TATA CONSULTANCY SERVICES | Salesforce developer

2020 - 2021 | Gurgaon, India

- Work as a Salesforce Administrator and Developer To provide best customer experience to our Leading Shipment Logistics company A.P Moller.
- Done extensive Development using Lightning Web component, Visual force, APEX, Test classes, SOSL, SOQL on the salesforce Platform
- Proficiency with Salesforce Data Loader for Import, Update and Export.
- In Depth Knowledge of REST and Soap API and experience in building integration with Salesforce.
