EXPERIENCE

Attra Infotech
Senior Software Engineer
Jan-2021 -

Capgemini India Private Limited
Consultant
May 2016 - Dec 2020

Infosys Limited
Senior Systems Engineer
April 2013 - April 2016

SKILLS

Programming Language : COBOL, JCL, SQL   Databases : DB2 (Mainframe), RDBMS

File Systems : Flat files, VSAM, GDG   Tools : File Manager/File Master, Endevor, Changeman, ISPF

Basic Knowledge : Easytrive, REXX   Scheduler : CA7, TWS, Control-M   DevOps Tools : JIRA, Confluence

Vision Plus Modules : CMS, FAS,TRAMS, CTA

PROJECTS

Project Greenfield

This project is introduced for all the HSBC portfolio of US sites. The requirement is to provide the same interface for different country sites, which will result in cost cutting, less labour effort and maintenance cost as well. Currently the Collection portfolio of these HSBC sites is using the different environment and interfaces which result in more maintenance cost and effort. This project was successfully implemented for APAC countries.

Project Spruce

This project is introduced for all the HSBC portfolio of APAC sites. The requirement is to provide the same interface for different country sites, which will result in cost cutting, less labour effort and maintenance cost as well. With the introduction of Spruce this will be handled via multiple instance where in the sites will be clubbed under different group which will be sharing the same base and any modification will be done at custom layer.

EMEA Batch support

The project included batch support of SIT batches for EMEA region. It also consisted of region building/refresh/cleanup activities and to setup smooth batch environment for SIT batches.

POA (Point of Arrival)

System is being overhauled to make it dynamic, which would avoid the need for changes to be installed whenever a new partner is on boarded

ROLES AND RESPONSIBILITIES

• Analyzing business requirements & impact in detail, Review of the design, Test Plans, Implementation of Development projects.
• Involved in project design discussions with senior leads to create simple, intuitive interactions and enhanced experiences as per project requirements
• Putting together Business solutions, capturing clear client requirements, high level estimates, supporting client functional tests and Business as usual support.
• Complete detailed programming and development tasks for back end.
• Owning the responsibilities of change implementation for a particular release
• Contribute to efficient large-scale software deployments
• Coordinate with front-end teams and different interface teams for end-to-end testing
• Automating various utilities and processes which can be an add-on project deployment activity and minimize manual work

EDUCATION

Solapur University   2012
Bachelor Of Engineering (Electronics)

Latur Board   2008
HSC - 12th

Latur Board   2006
SSC - 10th

TRAINING AND CERTIFICATION

Ø Basic Learning certification in JCL, COBOL, DB2.
Ø Completed Vision Plus Basics Certification from Infosys.
Ø Attended Agile SDLC Workshop ACH

ACHIEVEMENTS AND AWARDS

Ø Got Pat of the Back Award in Capgemini and HBSC (Client) rewarded to those who have the ability to understand the original reasoning behind key practices and procedures and who have always looked at things from project/organization prospective.
Ø Received 'Insta award' for a zero-defect SIT release at Infosys.
Ø Client appreciation on multiple occasions for outstanding work.
