Professional Assignments:

Project Details:

Client Name : Kantar

Testing Approach: Manual Testing, Java with Selenium, API, Bitbucket, JIRA, Source Tree, Postman and SQL.

Description:

Kantar market place is platform for creating surveys and maintenance. This application integrated with multiple external and internal applications and centralized all data to the user for easy access and billing. It has client and admin portal. Admin portal manages the users, survey reports and billing. Client portal is open for clients to create survey and select the audience, add the questions to it and launch, then client can check the status of that survey and client receive the emails on status changes.

Job Responsibility:

- Understanding the user requirements for every Agile scrum sprint release by interacting with client and Developers
- Preparing test cases for the User stories/requirements.
- Execution of Regression test cases for every scrum Sprint release.
- Creation, update, test, closing the user stories or bugs in Jira Software
- Testing the user stories in local environments (QA Local, Staging Local, Beta Local, Release local) before releasing it to Final Release branch
- Involved in Full Regression Testing and Supported for Production support.

- Involved in Agile processing like Story elaboration, Sprint Planning, Regressing testing, Sprint retrospective meetings.
- Involved in Test Automation Framework for Kantar Marketplace using Java with Selenium tool and TestNG Framework.
- Hands on experience in the Creation of Test Scripts in Selenium for the prepared test cases.
- Involved in running the mini regression and Full Regression scripts after each deployment.
- Involved in Browser Testing.(Chrome, Firefox, Edge, IE, Safari)
- Running the API Calls in Postman tool.
- Experience in Writing queries and perform data testing
