## Executive Summary

- 4+ years of total IT experience in ETL Testing & database testing using automation tools and manual validation.
- Sound knowledge on Data warehouse concepts.
- Sound knowledge in SDLC, STLC and defect life cycle.
- Well versed in data Integration and end-to-end testing.
- Professional experience in functional & Regression testing.
- Successfully completed cloud migration project with-in given timeline by driving the QA team.
- Saved 40% testing efforts by enhancing Python automation tool to validate unstructured data.
- Pitch in to automate over all testing approach, Saving 35% QA teams test effort.
- Flexible to Waterfall & Agile methodologies.

## Skill Set

<b>Role</b>	Level-3 Test Analyst
<b>ETL Tools</b>	IBM Data stage, Azure data factory & Synapse, IIDR, C-Data sync
<b>API Tools</b>	Postman, Soap UI
<b>Database</b>	MySQL, SQL Server, Oracle, DB2, SAP HANA DB
<b>Defect management</b>	JIRA, Version-1, Azure DevOps
<b>Automation Tool</b>	Python, Platinum suite

## Work Experience

**Organization:** Deloitte USI

**Project:** ITS CANADA- EDH

**Oct 2021- Till Date**

**Role:** III-Test Analyst

### **Project Description:**

EDH is an integration data hub, acts as central repository for all the projects handled by ITS CANADA. EDH to onboard data from heterogenous sources like flat files, API's and databases and transform according to business requirements and outsource it to downstream systems in Data shaping URL's, Flat files, or Data base tables format.

### **Responsibilities:**

- To attend architectural design discussion & BRD/FRD walkthroughs.
- Define test estimates based on requirements & get it reviewed with Team-lead/TDM.
- Develop test arti-crafts (Test plan, test cases, Test scripts).
- Run the ADF pipelines/Data stage/SOS Scheduler jobs.
- Execute the test cases and prepare validation logs.
- Log defects in Azure DevOps and perform regression testing on defects once fixed.
- Prepare and providing sign-off to Development team.
- Carry out smoke testing UAT and Production environments.
- Regular connects with TDM & PM to update the testing status.
- Work as secondary resource simultaneously on multiple projects.
- Review test design documents and validation logs created by other team members.
- Mentor new QA team members by conduct walk through sessions on project overview.
- Raise access request on test applications & provide required information/authorization steps.
- Connects with QA team members to discuss on issues/bugs identified & help them in resolving it.
- Work on enhancing the existing QA testing approach using ADF/Python automation.
- Act as scrum master for both EDH & QA teams.

### **Extension Activates:**

- Actively participate in QA COP connects and provide transitions on QA automation tool and JIIRA application usage.
- Worked along with Technocrats team on preparing Newsletters and organizing Technical Quiz.
- Review work efforts spent by resources on different projects. Update report as per manager comments.
- Guide newly onboarded resources on project related & learning activities.
- Take active part in L&D team by scheduling the transition sessions for all the ITS CANADA teams.

**AWARDS AND RECOGNITION:**

- Applause award in Q3-2021 at Deloitte
- Performance recognition in Q1-2022 at Deloitte.

**Organization: Cognizant Technological Solution**

**Project: EDM-Capex**

**Oct 2018- Mar 2021**

**Role: Quality Assurance Test Analyst**

**Project Description:**

Capex is Cognizant’s internal project to migrate from on-Prem to Azure Cloud and to build an enhanced cloud based ETL platform in place of the existing central repository system using advanced technologies and strategize to derive data, based out of various metrics.

**Responsibilities:**

- Create Test plan, test Cases incorporating all the Functional Test scenarios.
- Perform End-to-End testing by executing prepared test scripts in MySQL and Platinum.
- Test functionality and performance of automation scripts.
- Execute informatica jobs to fetch data and load it to different layers.
- Prepare test snapshots and provide sign-off for code migration.
- Automated data mart validation using Platinum by saving 30% effort and cost.
- Develop informatica mappings for generating the BI report on the employee’s effort

**AWARDS AND RECOGNITION:**

- Rookie for Q4 2018 in cognizant.
- Customer Satisfaction Award in Q2 2019 in cognizant.

**EDUCATION**

Title of the Degree with Branch	College/University	Percentage Obtained	Year of Passing
BACHELOR’S DEGREE	Andhra Loyola College	80%	2017
