Components, Aura

**IDE:** Developer console and  
workbench

**Tools:** Data Loader, SOAP UI,  
Postman (for Rest API's)

### ENVIRONMENTS

Salesforce Classic, Salesforce  
Lightning

### TOOLS

Bitbucket, Jenkins, Rally

### PROJECTS

#### **Bulk Merge (App exchange app development)**

This AppExchange app is used to identify duplicates from a specific object on a user defined criterion and merge them if there are too many duplicates in Salesforce.

Worked on batch classes to identify, insert and update the records in duplicate identification and merging process.

#### **3HTI (Sales cloud)**

This project includes enhancements to Sales cloud for setting up better Sales process. Successfully implemented process builder for creation of renewal opportunities based on certain criteria.

Written Apex batch class for updating opportunities. Also worked on Workflow, Process builder and Validation rules.

#### **Amplify (Sales cloud)**

This project included classic to lightning migration and application enhancement in the Sales cloud. Major work was to enhance the Sales process for creating renewal opportunities.

Worked on creating Apex classes, Test classes, Lightning Components, Process builders, workflows, custom metadata type to meet the client requirements.

Implemented shopping cart functionality using Apex, VF page And JavaScript.

#### **African and Eastern (Integration project)**

This project majorly focused on integration of the Salesforce org with .NET application for bringing in the Account records in Salesforce on daily basis using SOAP API of an external system and other enhancements which included work on Apex classes, triggers and VF.
