SENIOR TECHNICAL CONSULTANT

Career Brief:

Experience in the field of IT with focus on UI development of Web based applications. Involvement in Client Interactions to gather requirement and status reporting on daily basis.

EXPERTISE

JavaScript
AngularJS
Angular
HTML, CSS, Bootstrap
JQuery
HighCharts
C3 and Chart JS
Material UI
Adobe Photoshop
Jenkins
Jasmine, Sinon
Requirement Analysis
Client Interactions
Requirement Analysis
Education Domain
Asset & Fleet
Management
Oil and Gas Domain
Agriculture Domain

PROFILE

- Almost 5 years of experience in development and implementation of various applications including Web Application using JavaScript, Angular, Angular JS, HTML, CSS, Bootstrap and Material UI
- Experience in design and development of application using web technologies
- Understanding of Database design: MongoDB
- Developed CSS styles and themes for web pages
- Test cases implementation using Jasmine, Sinon and Chai
- Expertise in all phases of software development life cycle: Insightful experience in designing application, formulation of development strategy and creation of software products as per client requirements
- Jenkins build performed using CI/CD pipelines and worked on build issues
- Interacted with Clientele across various regions during scrum meetings, sprint review and sprint planning meetings to solve issues and update status
- Goal-oriented, multi-tasking professional with critical thinking, good troubleshooting, problem analysis and resolution
- Good communication, analytical and interpersonal skills; ability to perform as part of a team
- Ability to grasp and apply new concepts quickly and effectively

ORGANIZATIONAL EXPERIENCE:

- **Aug 2016 - Present with Hitachi Vantara (formerly Hitachi Consulting) as Senior Technical Consultant**

PROJECTS:

- **Industry** : **Education** (Jan 2019 – Present)
Environment : AngularJS, JavaScript , HTML, CSS, Dropwizard framework, Java 8, BitBucket, Jenkins, MongoDB
 - **Description:** Web application in Educational domain, which is used for evaluating students academically. It is an adaptive application, which assesses students' proficiency in Language Arts, Reading, Math, Science and Spanish. It is integrated and delivered via CI/CD framework, which uses Jenkins and Kraken.
- **Industry** : **Asset and Fleet Management** (Apr 2018 – Jan 2019)
Environment : Angular 2, Adobe Photoshop, C3 and Chart JS JQuery, Bootstrap, HTML, CSS, Java, Spring Boot, Jenkins
 - **Description:** Web application for asset and fleet management, location tracking, inventory status and tracking vehicular health. The application captures real time data of fleet, their movements and provide output in the form of charts, graphs and tables.
- **Industry** : **Oil and Gas** (Apr 2017 – Mar 2018)
Environment : Angular JS, JavaScript, HighCharts, ArcGIS Maps, JQuery, HTML, CSS, Bootstrap, Java, Spring Boot, MySQL, Jenkins
 - **Description:** Web application to visualise, on real time basis, the health status of the oil rigs, transformers and associated assets. It provided predictive analysis, based on historical data, in the form of Charts and Graphs using JavaScript visualisation libraries. The application is integrated and delivered via CI/CD framework using Jenkins.
- **Industry** : **Agriculture** (Nov 2016 – Mar 2017)
Environment : Angular JS, JavaScript, HighCharts, ArcGIS Maps, JQuery, HTML, CSS, Bootstrap, Java, Spring Boot, MySQL, Jenkins
 - **Description:** Web application to visualise, on real time basis, the health status of crops and environmental factors affecting them. It provided information with the help of third party JavaScript libraries. This application was helpful in monitoring the health and status of different types of crops, moisture, light, etc.

My Role and Responsibilities:

- Daily Standup and Status reporting in Agile based application development
- To develop, design, test, maintain, support and web applications
- Design and support UX team for creating wireframes
- Understanding and analysing the requirement
- Understanding the life cycle of software and determining any changes that may be needed as per the observations
- To identify and correct the software defects and to maintain the existing software systems
- Involvement in Preparation of application design documents
- Provide and be available for peer review of code within the team
- Performing Jenkins build and working on build issues for continuous integration
- Co-ordination with Onsite Team for developing scripts
- Interacting with Clientele for solving issues
- Ensure that the scripts are complete and executable
- Consistently improve quality of work and deadline adherence
- Performed different type of testing like unit testing, performance testing to ensure that application is working efficiently.

Achievements:

- Client appreciation in Mar 2021
- Quarterly award in Apr – Jun 2020
- Client appreciation in Jun 2019

Academic Qualification:

- MCA, GGSIPU, Delhi, 2016
- B. Sc.(H) Computer Science, University of Delhi, Delhi. 2013
- Higher Secondary, CBSE, Delhi, 2009
- Senior Secondary, CBSE, Delhi, 2007
