RESUME

Name: Gayathri Neerugatti

Contact: neerugattigayathri2000@gmail.com

Mobile: 9000593765

Certified RPA Developer

Professional Summary

- ➢ IT professional with over 3+ years of experience in the IT industry and around 3+ years of experience in **Automation** with proficiency as a Senior Developer.
- ➢ Worked on **UiPath work queues** to manage bot workloads.
- ➢ Have In - depth understanding of the principles and best practices of Software Configuration Management (SCM) in Agile, and Waterfall methodologies.
- ➢ Automated Web Based, Java Based, Mainframe, Desktop based applications using automation tool Blue Prism.
- ➢ Created Solution Design Documents (SDD) and Object Design Instruction Documents (ODI) for Robotic Process Automation projects, based on Business Process Design discussions with Business Stakeholders.
- ➢ Expertise in RPA processes, including requirements gathering, solution designing, coding, testing, debugging, documentation, and implementation using **UiPath**.
- ➢ Experience in identifying automatable processes for doing process assessments and robotic factor calculation.
- ➢ Innovatively integrated the advanced features of automation tools like OCR, web recorder for existing robots and improved the performance to the internal and vendor application.
- ➢ Created process model for windows-based application using **UiPath** and evaluating it in the inbuilt controller provided by **UiPath Studio**.
- ➢ Worked on **UiPath Orchestrator** to deploy, secure, and manage UiPath Robots.
- ➢ Involving test case development and documentation as well as unit and automated tests as needed and outlined in the sprint planning.
- ➢ Worked in AGILE/SCRUM and Software Development Life Cycle (SDLC) based development environment and participating in SCRUM sessions that includes Analyzing, Designing, Coding, Testing, Implementation & Production.

Technical Skills

RPA Tools	UiPath
Developer Tools	Visual Studio and SQL Server Management Studio
Operating Systems	Windows
Methodologies	Agile Scrum
Database	MySQL
Domain Knowledge	Banking, General Insurance, Human Resource

Education

Graduation	College/University	Place	Year of Completion
Bachelors in Business Administration	Emeralds Degree College	Tirupati, India	2020
Intermediate	Sreenivasa Junior college	Kalikiri, India	2017
SSC	Z P Girls High School	Vayalpad, India	2015

Certification

Certification	Issuing Organization	Issued Date
UiPath Certified Professional Advance RPA Developer (UIARD)	UiPath	Apr 2023

Professional Experience

Employer: Zillion Technologies Inc

Client: BNY

Role: RPA Developer

Project: TCS BANC Announcement Module

TCS BANC Announcement Module is the process to extract the request details based on the type of request i.e., Add User, Modify User, Delete User and Termination through Accesshub. Identify the request. Populate details into the Queue and extract the queue transactions by another bot and set transaction status to the every transaction, if any Business exception occurs Will compose the email by stating « Please process the request manually ».

Responsibilities:

- Worked on **Process Definition Document (PDD)**.
- Worked on **Solution Design Document (SDD).**
- Used **Re-Framework** for the design of the process and work queue management.
- Involved in Robotic Process Automation (RPA) from requirements gathering, solution designing, coding, testing, debugging, documentation, and implementation on tools like UiPath.
- Designed model for windows-based application using UiPath and evaluating it in the inbuilt controller provided by UiPath Studio.
- Used various actions like Conditions and Loops, User prompts, Error Logging.
- Identifying and debugging the errors using Error Handlers.
- Interacted with different mail services such as OUTLOOK.
- Used UiPath Orchestrator for deployment, monitoring, and management of UiPath Robot automation activity.
- Participated in online meetings to demonstrate the capabilities of RPA for on-going projects and potential clients.
- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.
- Used RE-Framework in UiPath for exception handling to define states in project.

Environment: UiPath, TCS Bancs Application.

Employer: Zillion Technologies Inc

Client: BNY

Role: RPA Developer

Project: Client Data Warehouse

Client Data Warehouse is the process to extract the request details based on the type of request i.e., Add User, Modify User and Delete User through Accesshub. Identify the request. Populate details into the Queue and extract the queue transactions by another bot and set transaction status to the every transaction, if any Business exception occurs Will compose the Email by stating « Please process the request manually ».

Responsibilities:

- Worked on **Process Definition Document (PDD)**.

- Worked on **Solution Design Document (SDD).**

- Used **Re-Framework** for the design of the process and work queue management.

- Involved in Robotic Process Automation (RPA) from requirements gathering, solution designing, coding, testing, debugging, documentation, and implementation on tools like UiPath.

- Designed model for windows-based application using UiPath and evaluating it in the inbuilt controller provided by UiPath Studio.

- Used various actions like Conditions and Loops, User prompts, Error Logging.

- Identifying and debugging the errors using Error Handlers.

- Interacted with different mail services such as OUTLOOK.

- Used UiPath Orchestrator for deployment, monitoring, and management of UiPath Robot automation activity.

- Participated in online meetings to demonstrate the capabilities of RPA for on-going projects and potential clients.

- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.

- Used RE-Framework in UiPath for exception handling to define states in project.

Environment: UiPath, Mainframe.

Organization: Tata Consultancy Services(TCS)

Role: RPA Developer

Project: TEFRA Letters (UiPath)

TEFRA Letter Bot is basically one of the policy letters. This is eligible for individual persons under TEFRA Policy. Based on provided input we are generating one letter for eachperson and then we are bundling them as one set of PDFS with maximum limit then sharing them to respective teams daily. This is annual bot Approximately will get 3.5+lacs participant recordsfor the year and we have a certain time limit to complete these records. Handling huge data so splittingthe data into multiple bots to perform 20K records per day. Based on requirement & Analysis we haveintegrated this into Loader and Processor. Sensitive information is involved in this, so We are Encryptingdata in particular cases. If there is any Business Exception from any bot we log and placing that file in a specified location on the final day.

Responsibilities:

- Worked with Business Analysts in identifying and defining requirements.
- Worked on **Process Definition Document (PDD)**.
- Worked on **Solution Design Document (SDD).**
- Developed the objects and workflows as per client requirement.
- Used Ui path automation elements such as Mouse, Keyboard and Attribute to automate the desktop sequence activities.
- Designed, developed, and tested Bot using RPA Ui path.
- Implemented selectors for interacting with window and web browsers for continuous navigation of applications.
- Used Screen Scraping method to extract text from running window application by appropriate output methods such as native, full text.
- Handled exceptions using Try-Catch activity.
- Deployed the process in UiPath Orchestrator and scheduled their execution.
- Used Queues to collect information from orchestrator to perform additional tasks.
- Configured the Bots and deploying processes and scheduled the jobs in UiPath Orchestrator. Interacted with different mail services such as SMTP, OUTLOOK, and IMAP.

Environment: UiPath, Excel, MS Outlook.

Organization: Tata Consultancy Services(TCS)

Role: RPA Developer

Project: Employee Onboarding process

This project is about getting all the information of each employee from the Employee portal, Input data has been stored into an excel file based on our requirements and then sharing a mail to the respective employee eithersuccessful or failure to load, we will load the details of each employee in the company database and sending email to new hires.

Responsibilities:

- Worked on **Process Definition Document (PDD)** step by step keystroke level.
- Worked on **Solution Design Document (SDD).**
- Designed solutions utilizing RPA best practices and maintain technical.
- Responsibility for project delivery.
- Login into GWCC page for to Search Claim no#.
- Navigating to policy page.
- Handled exceptions using Try-Catch activity.
- Updating the claim information as per requirement.
- Orchestrator assets & Queue handling.
- Exception handling as per process requirements.
- Re framework integration.
- Selectors Validation.
- Data table Extraction.
- Building Dispatcher & Performer Flows.

Environment: UiPath, Windows Applications, Company Portal, MS Office.

Personal Details

Date of Birth: 17 Apr 2000

Linguistic Abilities: English, Telugu

Married status: Unmarried

Nationality: Indian

Declaration:

I hereby declare that all the information given above is true and correct to the best of my knowledge.

Place: Kalikiri

Date: Signature
                                                                                                   N. Gayathri.
