EXPERIENCE

SALESFORCE DEVELOPER, ALTIMETRIK, JAIPUR – DEC 2021-PRESENT

- Working in highly integrated environment with strict Agile methodology and sprint planning.
- Part of transitioning project from Java environment to Salesforce from Scratch including all design changes and add-ons.
- Solid exposure on Salesforce CRM, Lightning Web Components (LWC), Apex and Triggers.
- Hands-on experience on Triggers, LWC, Sync and Asynchronous Apex, Test Methods, REST API's, SLDS, SOQL and SOSL, Salesforce Lightning, and other programs in the Salesforce developer toolkit.
- Proficiency in Data Modelling, Data Security and Automation tools (Salesforce Flow, Process Builder and Workflow Rules).
- Experience in writing test classes for generating code coverage.
- Implemented Security and sharing rules for various profiles and users.
- Working knowledge on Batch, Schedulable and Future Asynchronous Apex.
- Worked on Change Sets, ANT Migration Tool and various Data Migration tools like Data Loader and Data Import Wizard.
- Developed roles and profiles for US and UK region customers with aligned Permission sets and Role Management to suit the business requirement.
- Working in a scrum team of size 10 and delivering stories in a 9 day sprint with proper documentation and requirement gathering.

SALESFORCE DEVELOPER, FREELANCE – 2020-2021

- Integration development at Salesforce end to communicate data between Salesforce and SAP.
- Created Lightning components to provide interface to users for placing orders and track their status.
- Exposure of interface on community.
- User Testing and Manual Testing.
- Provide Issue fixes within the development cycle.
- Data Migration, community setup and user role , profile setup in new Salesforce org.
- Involved in setting up sharing rules for each profile and users based on user groups identified by Business as part of Requirement and Gathering.

SENIOR SYSTEMS ENGINEER, INFOSYS, JAIPUR – 2016-2020

- Built Lightning Components for Salesforce custom applications in Lightning experience.
- Designed and developed SFA based application on force.com in the Salesforce.com environment with Apex programming language at the backend and Lightning web components (LWC) as the user interface.
- Created various custom objects, Tabs, App Pages, Custom Labels, Connected App, Custom Metadata, Validation Rules as part of the project.
- Worked on different variants of the Salesforce Flows based on the scenario in consideration.
- Responsible for Customising custom fields, page layouts, permission sets, Custom settings, Profile settings, Role Hierarchy, Queue and Groups, SOQL and SOSL and formula fields for various operations as part of Development and enhancement.
- Additionally worked for Identity & Fraud ecosystem in Experian products with strategic clients under high paced scenarios.
- Part of work was to build delivery documents, transferring encrypted information critical to business users, config setup and requirement gathering.
- Sync with onshore team to improve build processes and ensure seamless handover of projects on weekly basis (3-4 clients per week).
- Team Lead in a size of 10 with accountability and synergy.
- Engaged in training onshore-bound resources with proper training plan and follow up loop.
- SME for various products like Crosscore, Mitek, Emailage and Autodoc projects.
