- ▶ Operating Systems: Windows

## EXPERIENCE

**Working for Duotronic Pvt Ltd as a Software Engineer from Oct 2019 to the Present.**

## PROJECT

### **TITLE: Property Search Portal**

*This portal simplifies and enhances the property search and transaction process, connecting buyers, renters, sellers, and real estate professionals while providing valuable information and resources to support informed decision-making in the real estate market.*

## ROLES AND RESPONSIBILITIES:

- ▶ Customized and tailored Salesforce.com to align with specific requirements.
- ▶ Created new objects and validation rules within Salesforce.com and integrated them with existing functionalities and objects.
- ▶ Worked extensively with standard Salesforce.com objects such as Accounts, and Contacts.
- ▶ Managed and enhanced custom objects, custom fields, custom tabs, and validation rules.
- ▶ Tailored various page layouts and assigned them to different user profiles.
- ▶ Developed tasks, email alerts, and components to meet the application's specific needs.
- ▶ Designed and executed Batch Apex and scheduled Apex classes based on client requirements, including field and record-level security measures.
- ▶ Utilized Apex code to send emails to specific users.
- ▶ Facilitated the import and export of bulk data through the Data Loader tool.

## **TITLE: Insurance Compensation & Management**

*We implemented and developed custom apps using the Salesforce Platform in this project. The project aims to serve as a comprehensive online platform for individuals, employers, healthcare providers, and other stakeholders to access information, resources, and services related to health insurance, healthcare, and wellness.*

### **ROLES AND RESPONSIBILITIES:**

- ▶ Executed various data-related DML operations, including data insertion, updating, deletion, and export, employing data loader tools.
- ▶ Implemented security access controls for user profiles, including object-level, field-level, and record-level security configurations.
- ▶ Took charge of customizing Objects, Page Layouts, Record Types, Email Templates, Validation Rules, Report Types, and flow processes.
- ▶ Engaged in the creation of Apex Triggers, Apex Classes, and Lightning Web Components.
- ▶ Contributed to the development of Test Classes for quality assurance purposes.
- ▶ the import and export of bulk data through the Data Loader tool.
