  - ➢ Requirement gathering and created lucid flows according to the process flow
  - ➢ Designed some interactive UI using lightning component and various business apps with Salesforce.com platform.
  - ➢ Creating Case study documents and takes updates from developers regarding assigned tasks.

Certifications

- ❖ **Salesforce Certified Administrator.**
- ❖ **Salesforce Certified Platform Developer-1.**
- ❖ **Copado Certified Administrator.**

Project Summary

1. Documents Organizer:

Document Organizer provides users with a slick and simple interface. It gives you total control over the organization of your data. You should be able to search and sort folders & files, and more. Also, you should be able to export any file.

Roles and responsibilities:

- ➢ Worked on standard object like Accounts, Contacts, Case, and Files.
- ➢ Implemented searching, and sorting.
- ➢ Created a function that supports email to case attachments.
- ➢ Created a function in JS controller to preview the files.

2. Loan Origination System with Salesforce:

One of the leading Canadian Financial Technology companies improves customers' financial situation and credit score with Salesforce Implementation by automating the adjudication process of their loan origination system. Client wants to manage all of their customer's data in Salesforce ecosystem. In this project we have to implement all of the client requirements in Salesforce so that they can easily manage their customer's data into Salesforce.

Roles and responsibilities:

- ➢ Configured User Interface settings and company Profile.
- ➢ Customized Profiles and created custom fields.
- ➢ Added custom fields and validations to new and existing objects.
- ➢ Worked with standard objects, business processes and field-level security.
- ➢ Added custom fields and validations to new and existing objects and added custom functionality using custom controllers and custom extensions.
- ➢ Created apex class to get the field information from the Application & populate the application field's value on Application selection, allowing entering other information.
- ➢ Created a custom lightning component for the custom list view.
- ➢ Created the lightning modal boxes to view the template and send emails to the Marble's customer.
- ➢ Used Bit bucket, and VS Code to deploy the code to the main dev.

3. Meeting Scheduler App:

The purpose of creating this app is to schedule the meeting by booking the slots according to service resource's availability. The customer's customer can book a slot by selecting the respective time-zone and date-time. After booking the slots send the invite using lightning sync feature. Select the available attendee according to the customer's interest on service.

Roles and responsibilities:

- ➢ Created lightning components and apex classes to handle front-end and backend activity.
- ➢ Created a dashboard for admin panel to set up org's branding, time slots, add service resources, services provided by the company and duration between each slots.
- ➢ Created custom settings to store the admin panel's details.
- ➢ Used the remote site settings so that we can integrate web conference apps like: WebEx, blue jeans, join me meetings etc.
- ➢ Created a custom site, embedded the lightning component in VF page so that we can use this VF page for scheduling the meetings by making the custom site as public.
- ➢ Guest user profile set up and created permission sets.

Education Summary

- • Arya College of Engineering & I.T: BACHELOR OF TECHNOLOGY (2013 - 2017).
- • Zinc Vidyalaya: Higher Secondary Education (CBSE 2012-13).
