### Graduation

Course B.Tech/B.E.( ECE )

College Kits, Khammam

Year of Passing 2017

## WORK EXPERIENCE

Apr 2018 to Sep 2021

**QA Engineer at Ventureneeds Soft Tech Pvt Ltd.**

**Project : PMO Tracker**

**Skills : HTML, CSS, JavaScript**

**Designation/Role : Front End Developer**

**Tool : Jira**

PMO Tracker is for ValueLabs Global Services to maintain various levels of documents i.e., Presales, Job Orders, Account Receivables, Legal, etc in a single repository. This document management system contains approval

workflows for the documents. PMO Tracker workflow has the modules.

My Responsibilities:

- Developed and maintained web applications using HTML, CSS, and JavaScript.
- Attending the scrum calls and addressing the action items.
- Worked closely with designers to ensure that user interfaces were visually appealing and intuitive.
- Collaborated with back-end developers to integrate front-end code with server-side logic.
- Tested web applications for cross-browser compatibility and web accessibility.
- Optimized web pages for speed and scalability
- Debugged and troubleshoot issues with web applications.
- Stayed up to date with the latest trends and best practices in web development.
- Used front-end frameworks such as React to build complex web applications. Wrote clean, maintainable, and reusable code.
- Participated in code reviews and provided feedback to other developers.

**Project : Toolbox**

**Client Name : N/A**

**Database : SQL 2005 and 2010**

**Testing Approach : Manual Testing**

**Tool : TFS 10.0**

The IKEA Toolbox is a CMS application developed using SharePoint 2007. It's an online e-learning portal for IKEA stores and employees all over the world where they can View, Order & Download Documents, Pictures, DVDs and videos related to IKEA concepts and apply for different Training Programs.

My Responsibilities:

- Understanding the Change Requests.
- Participating in Release, SprintPlanning, Review, Introspection, and Retrospection meetings.
- Attending the scrum calls and addressing the action items.
- Developing Test cases on Test scenarios based on acceptance criteria
- Creating Test Plan for each user story
- Uploading the test execution results into the SharePoint portal
- Performing functional, Regression tests as per standards and process in a test plan.
- Providing estimates for manual tasks.
- Executing manual regression test cases.
- Attending weekly QA status meetings.
- Performing smoke, sanity, regression, and re-testing
- Analyzing Test Results and creating Bug Reports.
- Defect tracking through TFS 10.0.
- Attending training within the organization.

Sep 2021 to Present

**Senior QA Engineer at Impetus Technology Pvt Ltd.**

**Current Project: Klerainsight**

**Designation: Senior Quality Engineer**

**Testing Approach: GUI Testing**

**Testing Tools: Selenium IDE, Eclipse**

**Defect Tracking Tool: Jira**

Comtrail-NX is a Mass monitoring solution to Capture, Process, Enhance, and Store data and applies intelligence to analyze data and get required information through various Data Applications.

? Comprehensive Transaction Analysis, Targeted Data Analysis & Management Application

My Responsibilities:

- Analyzing user requirements, and developing Test Cases and Test Scenarios.
- Prepared Traceability Matrix between test cases and requirements
- Involved in preparing Test Plans, Test Strategies.
- Preparing the test cases and taking part in peer review of the test cases.
- Prepared Test Case Documents and Review the Documents.
- Executed Test Cases and verified actual results against expected results.
- Participated in meetings, Reviews, walkthroughs, and test design reviews.
- Involved in Smoke & Sanity Testing, System Testing, Retesting, and Regression testing.
- Analyzing the results after the test execution is completed.
- Raising defects in the defect-tracking tool for the failed test cases.
- Providing adequate support to the developers for defect analysis.
- Providing a collective status report of the team to management.
- Participate in Sprint planning meetings to identify Sprint Backlog.
- Participate in daily scrum meetings. Worked on cross-browser testing on IE, Firefox, and Chrome.
- Interacting with developers and business analysts to resolve all testing-related issues.
- As a tester, I need to check the final outcome of the software as per the client's requirements without defects.
