Concepts	Algorithms, Data Structures and OOPs Concepts
Scripting Languages	Ajax, JavaScript, Aurelia, HTML and CSS
Application/Web Servers	JBoss, Apache Tomcat
Databases	Oracle, MS-SQL, Postgres
Utility Tools	Net Beans, Eclipse, Spring Tool Suite, SQL Developer, SQL WorkBench, SVN, GIT, Bitbucket, GitLab, SQLYog Community, Putty, WinSCP, MoboXTerm and MS Office.
Hardware / Platforms	Windows and Linux

## Key Achievements

- Certified **Scrum Master** from SCRUM ALLIANCE
- Completed **OCJP** certification on Java 6
- Consistently got Performance Evaluation and Appraisal rating of **5** (Outstanding Contribution) in my career.

- I have received two **SPOT** awards for my outstanding contribution in project development from **SONY INDIA**
- Handled & driven multiple projects to closure and developed strong relationship with Clients and Team members.

### Annexure of Key Projects Handled

#### **At OpenText India, Hyderabad**

##### **Product Title                      Process suite App Works Platform**

Environment: Java 8 and Java 11

Frameworks: Core Java, Cordys, Web Services, JUnit4

Team size : 11

Role : Lead Developer

#### Project Description:

OpenText Process Suite Platform is a Paas application in which it provides platform to clients, enabling them to develop, run, and manage business applications without the need to build and maintain the infrastructure such software development processes typically require. It will provide platform to build business application and it has integration with several other products to combine all features together. Any business application can built by using the platform with the help of entities and these entities can connect with external systems with the help of BPM services.

#### Roles & Responsibilities:

1. Functional design
2. Involved in architecture designs
3. Lead developer
4. Maintenace and support
5. Code review and take care of weekly builds

## **At Sony India, Bangalore**

<b>Project Title</b>	<b>Enterprise Portal</b>
----------------------	--------------------------

Period: Sept '12 –Mar '15

Environment: Java 7

Frameworks: JSF 1.2, Hibernate 3.0, Spring 2.5, Ant Build, Quartz scheduler and Oracle 11g

Team size: 5

Duration: 28 Months

Role: Senior Developer

### **Project Description:**

Enterprise portal is a web application which is built upon Java EE Technologies Spring and Hibernate, which is a common service platform for all Sony employees across the world. This application is useful for all employees to see daily updates in SONY like what's happening @ Sony, Notifications, Reminders, Contacts, Blogs, Carousel, Insurance, Sony Policies, Tidbit, Kirana etc... It contains two different roles those are admin and Employee. Admin responsibility is to add the content and publish the same to visible to employees. Admin can set the publishing start date and expiry date for each content. In the background cron job runs for every 5 mts to refresh the published content.

### **Roles & Responsibilities:**

1. Creating User Requirement Specification (URS)
2. Creating the Functional specification (FS)
3. Releasing the changes to UAT
4. Analysis of UI design and involving UI design and code development
5. Detect and fix defects if any during unit testing and integration testing
6. Code review and take care of weekly builds

<b>Project Title</b>	<b>Travel Portal</b>
----------------------	----------------------

Period	Sept '11 – Mar '15
--------	--------------------

Environment : Java 7

Frameworks : JSF 1.2, Hibernate 3.0, Spring 2.5, Ant Build, Quartz scheduler and Oracle 11g

Team size : 5

Duration : 28 Months

Role : Senior Developer

**Project Description:**

Travel Portal is a web application built upon Java EE technologies, JSF, Spring and Hibernate, which is a common service platform for tracking the travel details of all Sony employees. This application is being used by all Sony employees across India. It is used to raise travel requests and getting approval for the same. Based on Visiting area Finance team calculates the foreign exchange and distribute the same to employees who ever travels. Travel desk team, Finance team and other employees related to travel portal updates the employee travel details and employees submit their bills in the portal after completion of travel. Same bills can be verified by manager and Finance team. Based on provided bills Finance team verifies the same with travel requests and settles the employee's amount.

**Roles & Responsibilities:**

1. Analysis of functional specification and involving in Splint planning & estimate
