Project Overview:

1. Client	:	COLT, United Kingdom	
Product	:	Voice on Demand	
Domain	:	Telecom Domain	
About the Project	:	Voice On Demand is cloud-based contact centre, that allows you to select country, number type, number range and quantity for fast and simple ordering, supported by intuitive filtering options and no paper form.	
Approach and Technology Used in Project	:	Development and Technology tools used	Jboss Application Server, Eclipse, Oracle DB. Java, Angular JS, PL/SQL Spring Boot, Microservices, Jenkins
Role & Responsibility	:	<ul style="list-style-type: none">• Requirement gathering and Feasibility analysis• Create High level Design Document• Developed the modules using Java, PL/SQL.• Unit Testing and Bug Fixing.	

2. Client	:	Bank Of Ireland, Ireland		
Project Title	:	Mortgage and Corporate Loan Process		
Domain	:	Banking Domain		
About the Project	:	Mortgage and Corporate Loan Process which is used for banks and financial institution to provide various business processes/activities performed in processing of Loan application.		
Approach and Technology Used in Project	:	Development and Technology tools used		Jboss Application Server, Eclipse, SQL Dbx. Java, Angular JS,PL/SQL, Spring MVC
Role & Responsibility	:	<ul style="list-style-type: none"> Requirement gathering Feasibility analysis Create High level Design Document Develop the feature as per customer requirement. Developed the modules using Java, PL/SQL. Unit Testing and Bug Fixing. 		

3. Client	:	State Bank of India, Bajaj Auto and Consumer finance		
Project Title	:	FinnOne		
Domain	:	Banking Domain		
Approach and Technology Used in Project	:	Development and Technology tools used	:	Web sphere Application Server, Struts, Oracle 10g Java, PL/SQL
Role & Responsibility	:	<ul style="list-style-type: none"> Requirement gathering Feasibility analysis as per the database schema. Create High level Design Document. Develop the feature as per customer requirement. Developed the modules using JAVA and PL/SQL Unit Testing and Bug Fixing. 		

4. Client	:	India and Middle East, Gulf Countries		
Project Title	:	ebizFrame		
Domain	:	Enterprise Resource Planning		

About the Project	:	ERP is a category of business-management software—typically a suite of integrated applications—that an organization can use to collect, store, manage and interpret data from many business activities.		
Approach and Technology Used in Project	:	Development Tools and Technology Used	:	Oracle ADF, Oracle 12c, JDeveloper Java, PL/SQL
Role & Responsibility	:	<ul style="list-style-type: none"> Requirement gathering Feasibility analysis Create High level Design Document Develop the feature as per customer requirement. Developed the modules using Java, PL/SQL. Unit Testing and Bug Fixing. 		

Technical Skills

- Operating Systems : Windows, Ubuntu
- Development Tools : Oracle ADF, JDeveloper, Eclipse
- Bug Tracking Tools : DART, JIRA, ALM
- Programming Skills : Java, AngularJS, Angular 5
- DBMS Package : MS-Access, MySQL, Oracle 12c, PL/SQL
- Frameworks : Struts, Spring MVC, Spring Boot, Jenkins

Academic Background

- ☐ **2011-15:** Bachelor of Engineering from CSA University, Kanpur graduated in 2015 with 7.34 CGPA.
- ☐ **2009-11:** Higher Secondary Certificate (XII) from DRLIC, AmbedkarNagar graduated in 2011 with First Division.
- ☐ **2006-08:** Secondary School Certificate (X) from DAV Public School, AmbedkarNagar graduated in 2008 with First Division.

EXTRA CURRICULAR ACTIVITIES/ AWARDS AND HONOURS
