PROJECTS

Case Advisor (03/2022 - Present)
□ It is a health care related website.

Haspit (10/2019 - 03/2021)
□ Haspit is File System Project using Blockchain Technology. In Haspit I have worked on both Frontend and Backend. My primary task is document Viewer, User can view documents, can drag & drop pins & comment corressponding to that pin and can also self sign or request for other users to sign by drag and drop signature on the document. I have also designed web pages.
□ I have created Haspit extensions which will add buttons in gmail, yahoo and outlook inbox. If the user clicks on the Haspit button after completing his mail, mail body and files will be stored in Haspit server using blockchain and Haspit link will be sent to users. Users can view there messages in Haspit web app.
□ I have also worked on windows application which on installing create a folder in the system. All the files or folders that are moved or pasted in that folder will upload to Haspit server.
□ Technologies Used - Angular, .Net, windows application and SQL Server.

Jobs-zone (12/2020 - 03/021)
□ Jobs-zone is an Interactive Digital Platform for Job Seekers and Companies and Educational Institutions. I worked in this project on both Frontend and backend.
□ I have also worked on python for face recognition and signature recognition.
□ Technologies used - Angular, .Net, Python and SQL Server.

Blocdrive (03/2021 - 12/2021)
□ Blocdrive - An online interactive storage system using Blockchain Technology. I'm working in this project on both Frontend and Backend.
□ I have also worked on windows application, which will migrate files and folders from gmail to blocdrive.
□ Technologies used- Angular, .Net, Windows Application and SQL Server.
