ABOUT ME

As a dedicated professional with over 8 years of expertise in the Salesforce Ecosystem, I am eager to bring my leadership and technical skills to a reputable organization. My career has evolved from a Salesforce Admin/Developer to a Team Lead for the past 3.5 years, where I have significantly contributed to team achievements and honed my abilities. Holding 7 Salesforce certifications, including "PD1", "App Builder", "Advanced Admin", and "Experience and Sales Cloud" consultant, I am well-versed in a variety of critical functions such as Release Updates, Data Migration, Data Management, and System Health Checks, all aimed at maintaining operational excellence.

My technical proficiency is demonstrated through my experience in creating efficient page layouts, managing components to boost user experience, and designing custom objects, fields, FLOWS, Workflow, Process Builder, and Approval Processes. I am skilled in Apex, Triggers, Batch Classes, Visualforce Pages, Aura Components, and LWC development, and proficient in system integrations using REST API. My background in both Agile and Waterfall methodologies underpins my approach to project management.

I take pride in my ability to gather requirements, perform analysis, and provide accurate estimations, ensuring that Design & Technical Documentation is thorough and clear. My strong communication and interpersonal skills have proven effective in both large and small team environments, where I have also served as a mentor to new team members, assisting them with technical and functional challenges.

My experience extends to Data Migration using tools like AutoRabit, Data Loader, and Import Wizard, as well as Validation and Deployment for various release scales. I am committed to driving positive outcomes and am poised to contribute to the growth and success of a forward-thinking organization.

WORK EXPERIENCE
