PROJECTS

Project 1 - Lease Management System

This project main goal is to develop application for owners of multi store buildings for lease out units in their buildings to different Tenants.

App Building:

- Created Aura and LWC Components.
- Migrated existing Visual Force pages into Lightning look and feel.
- Worked on Apex Triggers, test classes.
- Adding multiple custom objects and records
- Email notifications with the help of workflow rules
- Created Email templates, Visual flows, Lightning App builder pages.
- Adding Reports and dashboards to the application will help the owners to track revenue generated
- Users of the system can easily access and customer friendly
- Deployed Components using Workbench and Changesets.

Project 2 – Mileage Application

This project is about working of mileage calculation will be automated and can make the date of mileage report easier and faster, everything can be stored in this application.

In the existing systems we need to maintain the data base for that we need to buy the space offered by the companies.
