WORK EXPERIENCE

Software Engineer
Accenture, Pune
Jun,2020 - Present

- Worked in release 2.2 from Sprint 10 to 12. As a Salesforce Developer, my responsibility was to manage the overall progress of Salesforce-Banking Application.
- Established and implemented best practices with regard to system maintenance, configuration development, testing, data integrity etc.
- Work effectively with key business stakeholders to analyze business requirements and convert them into technical details.

Associate Software Engineer
Accenture, Pune
May,2018 - May,2020

- Worked in release 2.1 from Sprint 1 to 9. My primary role in the project was to build a loan origination system for a financial services US-based Client using Salesforce and nCino - cloud banking software
- Majorly worked on building UI for Loan Origination System using nCino .
- Developed Apex Triggers, Workflows, Batch Apex, Apex Test Classes and other Process Automation Tools for various functional requirements in system.
- Was part of the Release Management team , did UAT deployment and helped in Production deployments by preparing runbook ,handling multiple merge conflicts and maintaining communication with onshore team using CI/CD tools like Flosum.

ACCOLADES

- Achieved Accenture Rising Star Awards (FY 20)
- Gained P4(Expert) proficiency in Salesforce Development in the organization.
- Received recognition from Manager for Delivering Excellent Outcomes.
- Awarded Accenture Spark Awards (FY 19)
