WORK EXPERIENCE

Software Engineer

Hexagon Global

08/2019 - Present

Bangalore, India.

Hexagon mPower is an end-to-end investment management product designed to double operational efficiency and provide high quality user experience.

Roles/Responsibilities

- Working as a Back-end Developer in hexagon global Mpower team which offering end-to-end investment management product to their clients.
- Customizing the product based on client requirements.
- Fixing the existing product bugs.
- Adding new modules and features in product.
- Role: Developer | Tech Stack: NodeJS, JavaScript, MongoDB, PostgreSQL, MySQL.

PERSONAL PROJECTS

Api Rate Limiting (10/2020 - 10/2020)

- Rate limiting protects your APIs from overuse by limiting how often each user can call the API.
- This protects them from inadvertent or malicious overuse.

Covid Statistics (11/2020 - 11/2020)

- During any virus outbreak, the governments are supposed to constantly look at the new hotspots, mortality rates, etc of different states.
- I have created an API server that performs some aggregation tasks on the Covid data. This data is stored in the MongoDB server.

News Feeds using MongoDB (12/2020 - 12/2020)

- In this fast-growing economy, it's very necessary to be up to date with the news. Easier said than done.
- One of the major problems is a slow news server.
- So I have Created my own API to send stored news data from our own MongoDB server.
