EXPERIENCE SUMMARY

- ❖ Having 4.3 years of experience in IT as a QA with Manual Functional Testing , API testing, Web services Testing Database Testing and Agile Methodology
- ❖ Hands on experience in API Automation with Postman and SOAP UI tool
- ❖ Well acquainted with Software Test Life Cycle, Software Development Life Cycle and Bug Life Cycle.
- ❖ Involved into the sprint planning meeting for understand the user story, scope , Impact and Priority of the same
- ❖ Good understand the Acceptance criteria of the user story and design the test scenarios for both API and Manual changes
- ❖ Strong experience in **Manual Functional Testing with Agile scrum and JIRA Tool**
- ❖ Good understanding of Sprint planning, product backlog, sprint backlog and sprint goals
- ❖ Involved and experience at each phase of Testing life cycle, Testing process and Regression Testing
- ❖ Experience to design the test scripts for both Manual and API testing in JIRA zephyr squad
- ❖ Hands on experience into JIRA cycle summary for Test cases execution and defect logging
- ❖ Strong experience in re-test the bugs and closed the same with JIRA workflow
- ❖ Good understanding of RTM and TEST Plan documents for Testing process and Tracking the issues
- ❖ Involved in Functional, Regression testing, Smoke testing, compatibility testing, Sanity testing and Defect reporting
- ❖ Basic experience into the SOAP UI tool for API testing and validate the response with Assertions
- ❖ Exposure into the SOAP UI properties and Property Transfer concepts using SOAP UI tool
- ❖ Good exposure into Swagger, Service documents and AP documentation for API testing
- ❖ Hands on experience into **API Testing using POSTMAN and REST Client**
- ❖ Well understanding of **URI, Headers, JSON, HTTP and API**
- ❖ Exposure into design the test data for API Testing and validate the response data
- ❖ Good experience in Data Driven testing using POSTMAN with CSV files
- ❖ Basic experience of postman Neman and environment setup for testing API
- ❖ Good experience into the Cross browser testing for checking the compatibility
- ❖ Basic knowledge into the Mobile APP Testing and Mobile Browser Testing
- ❖ Strong experience into collection variable, global variable and environment variables
- ❖ Experience in JSON validation using Snippet , API chaining and Other online tools
- ❖ Strong experience into API Automation with SOAP UI and READY API
- ❖ Good understanding of the SOAP UI features like Properties, Property Transfer, Assertions, Delay and Manual Test Steps
- ❖ Good exposure into Ready API Tool features like Assertions, Data Driven, Data Sink, Data Gen, Properties, Property Transfer and Reporting
- ❖ Work experience into **Agile environment** such as **Sprint Planning, Review, Daily call, Triage and Retro**
- ❖ Experience to use the **collection variables, Global variables and Environment variables**
- ❖ Good Experience on Database Testing using **SQL**
- ❖ Having good problem solving skills and Root cause analysis of Bugs
- ❖ Highly motivated with an ability to meet tight deadlines and perform multiple tasks simultaneously.

PROFESSIONAL EXPERIENCE

- ❖ Working as a **TEST ENGINEER in ACERT IT Solutions Pvt Ltd**, Bangalore from Dec 2018 to till date.

EDUCATION

- ❖ Completed Master's Degree from JBIET College, Hyderabad.

TECHNICAL SKILLS

Operating System	Windows Operating Systems
Tools	SOAP UI, REST Client, Advanced REST Client, POSTMAN & Ready API
Web Services Protocols	SOAP and REST
Methodologies	Agile Scrum, Waterfall and V-Model
Automation	API Automation with SOAP UI
Databases	Oracle, MySQL and SQL
Defect Tracking Tools	JIRA
Other Languages	JOSN PATH, JSON,XML, XPATH and SQL

PROJECT PROFILE

PROJECT DETAILS:

Project#1:

Name: SFM

Client: Sprouts Farmers Market

Role: API Tester

Environment: REST, POSTMAN, JSON, JSON PATH, SNIPPET, SQL, JIRA and AGILE

Description:

Sprouts Farmers Market, Inc., is a supermarket chain headquartered in Phoenix, Arizona, USA. The grocer offers a wide selection of natural and organic foods, including fresh produce, bulk foods, vitamins and supplements, packaged groceries, meat, poultry, seafood, deli, baked goods, dairy products, frozen foods, natural body care, and household items. Sprouts employ 35,000 workers and operate more than 380 stores in 23 states. Some say natural is the new normal but at Sprouts, there's nothing new about natural foods back in 2002, and we opened our first store in an effort to make natural foods accessible to everyone.

Roles & Responsibilities:

- Understanding the business needs and requirements & analyzing the services document, experience to test REST services using Postman tool.
- Good understand the user stories and plan them as per business requirements and client demand
- Analyze the user stories and design the analysis and scenarios as per Acceptance criteria

- Verify the test scenarios and reviewed the cases with reviewers and finalized and approval the ame
- Involved into Planning meeting for understand the sprint goals, impact and scope
- Interacted with business analysts and end users for better understanding of the application functionality
- Hands on experience to design the test cases as per design techniques
- Exposure to design the test cases and uploaded them into JIRA as per Swagger
- Good understanding of RTM document for Bug tracking and find the root cause of bug
- Understanding of API service documents and Swagger document for Testing APIs
- Experience of API testing with POSTMAN Tool and validate the response
- Explored the JSON file and prepare the test data and validate the response
- Hands on experience into POSTMAN collections for sharing, Group execution and export
- Usage the different types of collections for Testing: Local, Global and Environment
- Experience to use the POSTMAN Snippets for JOSN response validation and API Chaining
- Exposure to the Data Driven Testing with POSTMAN using CSV and JSON files
- Basic experience into the SOAP UI tool for API Testing and validate the response with assertions
- Experience to setup the environments and understand the same
- Good knowledge on parameterization concepts for Data, Endpoint and Header parameterization
- Execute the Test cases using JIRA Tool and report the status on user story wise
- Perform the different types of Testing , Smoke, Sanity, Functional , Re-Testing , Regression, Exploratory Testing and Ad-hoc Testing
- Work experience of Test management Tool JIRA and closed the Bug
- Report and discuss the Bugs in Bug Triage calls
- Participate into Agile activities : Planning, Daily status , Review and Retro calls
- Exposure of Data base Testing using SQL for Data validation from DB
- Experience to Test the APIs and Application in different environments TEST/QA/Staging
- Prepare the Status reports and share to the Management for tracking and decision purpose

Project#2:

Name: SAL

Client: Save A Lot

Role: API Tester

Environment: REST, POSTMAN, JSON, JSON PATH, SNIPPET, SQL, JIRA and AGILE

Description:

Save A Lot Food Stores Ltd. is an American discount supermarket chain store headquartered in St. Ann, Missouri, in Greater St. Louis. It is a subsidiary of Onex Corporation with about 900 independently owned and operated stores across 32 states in the United States with over \$4 billion in annual sales. Save A Lot Food Stores Ltd. is an American discount supermarket chain store headquartered in St. Ann, Missouri, in Greater St. Louis. It is a subsidiary of Onex Corporation with about 900 independently owned and operated stores across 32 states in the United States with over \$4 billion in annual sales.

Roles & Responsibilities:

- Analysis the system requirements and user stories for Test plans, Test Cases, Test Data for manual testing and API testing of the Applications.
- Responsible for design RTM document and Understand the Swagger and services documents
- Analyze the requirements and created the sub tasks into the JIRA for each User story
- Planning the activities and pick the user stories as per priority define in the planning
- Communicate with the Team members for full fill the requirements (QA – BA) or (QA – Dev) sync calls
- Identify the scope of the API testing from User stories and design the plan and Test cases
- Hands on experience to test API's using POSTMAN tool
- Good experience in POSTMAN Collection , Global and Environment variables
- Perform Data Driven Testing in POSTMAN tool with CSV and JSON files
- Participated in Regression testing after each build
- Validate the JSON response using POSTMAN snippets and Third party tool JSONPATH.com
- Hands on experience to use different Headers and Parameters in POSTMAN
- Good experience to use Pre-request script and Tests scripts SNIPPETS
- Hands on experience to manage Environments and Property Transfer in POSTMAN
- Export the test cases into JIRA tool and execute the same into JIRA
- Good experience to logging the defects and discuss into the Bug triage calls and closed the same
- Perform the different testing on the applications (Manual and API Testing)
- Perform the Testing: Smoke, Sanity, Re-Testing, Regression , Exploratory, Ad-hoc and System Testing
- Attended Daily & Weekly Defect Review and Defect Status meetings. Provided updates to Business, Customer and other stake holders.
- Reviewed test cases as per business requirements, ensured implementation of testing techniques wherever required and coverage of positive and negative scenarios and finally get them signed off from client.
- Participated in Defect management meetings with the development, design and Subject Matter Experts.
- Participating into Daily Status call and Daily standup calls

DECLARATION

I hereby declare that the above written particulars are true to the best of my knowledge and belief.

Date:

Place: Hyderabad.
