### CAREER SUMMARY

I am a skilled IT professional with over 4 years of experience in Salesforce. I am a certified Salesforce professional with expertise in designing, developing, and implementing complex Salesforce solutions. I have good communication and leadership skills and the ability to perform well in a fast-paced business environment.

In-depth knowledge of business across domains with specialized skills in designing highly efficient end-to-end CRM solutions. Performance-driven and hard-working with strong technical and functional expertise and a track record of success in leveraging the Salesforce platform to provide organizations with capabilities, functionality, process builder automation, flows, and reports. Experience in designing, developing, and implementing applications like Sales, Marketing, Partner Portal, and Service and Support modules. Worked on various Salesforce.com standard objects like Accounts, Contacts, Opportunities, Products, Cases, Leads, Reports and Dashboards.

### SALESFORCE PROJECTS & LIVE PROJECTS

#### University Project for student lifecycle management: (Currently Working)

- **Salesforce:**

- Integrated CTI Knowlarity to enable calls and store data in Salesforce.
- Developed batch and scheduled Apex for lead and contact assignment to counselors in a round-robin fashion.
- Created record-triggered flows to execute complex logic based on multiple conditions.
- Built Screen Flows, Quick Actions, and Buttons on detail and list view pages.
- Developed Visualforce pages for offline payment challan and student fee structure.
- Implemented a Scholarship LWC component for selecting scholarship categories and displaying relevant details.
- Created an Aura component for displaying and processing provisional admission fees.
- Ensured object, field, and record-level security for data protection

- **Deployment-** Deployed Omniscript elements through IDX Workbench.

#### Internal Projects:

- **IT Services-Resource Allocation Project-** Worked on Marketing, Sales, and Service modules, and was involved in multiple tasks such as developing a Web-to-lead form to capture leads, implementing automatic rating calculation based on BANT theory, creating flow automation for assigning employees to different projects, generating reports and dashboards, and setting up a web to-case form to capture cases along with Live chat functionality.

- **Election Commission Project-** Worked on migration of election data from Excel to Salesforce, mapping and transferring the data accurately to relevant objects.

- **Hotel Reservation Management Project** - Contributed to the Sales module by implementing Quick actions for efficient record creation and updating, configuring Buttons, and Dynamic actions for

conditional visibility of fields on the layout, as well as creating Reports and Dashboards for improved data analysis. Worked on Flow automation for Sales Org enhancements of the company's Salesforce application.
