Technical Expertise:

- Salesforce Lightning(Aura and Web Components(Basics))
- Apex(Synchronous and Asynchronous) and triggers
- Configurations and Drag-Drop Developments
- Integration(Basics) and Metadata

Technical Certifications:

- Salesforce Certified Administrator
- Salesforce Certified Platform App builder
- Salesforce Certified Platform Developer I
- Salesforce Certified Platform Developer II
- Salesforce Certified Service Cloud consultant

Project Overview:

Salesforce Consultant, HCL Technologies (Aug 2019 - Present)
Client - Duetsche Bank

Global Engage Program:
Global program to rollout salesforce CRM with Financial services cloud for wealth across the regions of bank like APAC, Germany and US.
- Being a lead Developer of global program, I need to closely involve in designing and building generic solutions.
- Build generic lightning components and adopted a framework to dynamically call controller based on region.
- Build generic triggers pattern and adopted a framework to dynamically call handler based on region using custom metadata
- Configured territory based sharing model
- Migration from Global CRM to Salesforce
- Deployment to different environments using GIT, ant tool and SFDX.

Sales Enablement:
A tool for Relationship and Sales managers to plan their financials, achieve targets and manage their clients.
- Having been part of the project right from the start, I was responsible for designing and building the functionally rich and secure application on Salesforce platform
- Involved in requirements gathering & clarification, estimation, designing and design reviews with business.
- Build technical solution in line with the business requirement

Pricing Configurator:
A contract based java application that is used by German to create product based contract.

- As a java developer I was assign to this project, parallel with Global Engage, I have learned & worked on java spring boot technology, and have built an API for this project to get High water mark pricing and billing.

Application Development Analyst,

Accenture Solutions Pvt. Ltd (2016- Aug 2019)

SFDC Innovation Team:

Innovation team build generalize lightning components and web components to gain user interest and help other project with new features of salesforce

- Development of various lightning components, Lightning web components, applications, events, pages, bolt communities, flows, processes, workflows, synchronous and asynchronous apex, triggers, implementing security model using roles, profiles, permission sets, sharing rules, OWD. Created record types, page layouts
- Developed a general web component that can be used by various other banking project and that won the salesforce day 2019 lightning hackathon in Accenture and star of the month award
- Developed a Generic component for connecting salesforce to conga composer.
- deployment via change sets.
- Worked on NBA, Locker Fixes, Service cloud.
- Configured outlook with salesforce to create object on mail sent.
- Unit testing, test classes, code coverage and packaging.

Citizen:

Front end developer

- As a CSS Expert I was assigned to this project for a month, I have fixed dynamic issue of visual force component during deployment.

Amtrak:

Community Developer

- As a Bolt Community Developer I was assigned to this project for a month, I have built community for mobile and created a Responsive page for their portal.

Academics:

Bachelor of Engineering from L.D.College of engineering, Gujarat in June 2016 with 8.6 CPI
