(Java Experienced)

Experience Summary :

- Having 5 year of experience in developing **server side** components using J2EE technologies, java frameworks.
- Good knowledge of **Object Oriented Programming** concepts.
- Having knowledge on Java, J2EE **Design Patterns** (MVC, Singleton, DAO, Value Objects).
- Experience in development of object-oriented business applications using **Java, JDBC, Servlets, JSP, Spring, Spring boot, Spring REST, Microservices**.
- Good team member, positive attitude and result oriented Self-motivated, quick learner, willing to adapt to new challenges & new technologies.

Experience Profile :

- Worked as Software Engineer for **Sysoi Tech Private Limited** from Sept 2017 to March 2019
- Working as Sr.Software Engineer for **Webkorps Optimal Private Limited** from April 2019 to Till Date.

Academic Profile:

- Graduation in **Electronic And Telecommunication** from **Pune University** in 2019.

Technical Profile:

SKILL	EXPERIENCED
Languages	JAVA 8, 9
Operating Systems	Windows 10
UI Technologies	Html 5, CSS 3, JavaScript, Bootstrap 4, JQuery, Ajax, Angular
SQL DB Softwares	Oracle 11g, MySQL 5.0
JSE Technologies	JNDI, JDBC
JEE Technologies	Servlets4.x, JSP 2.0

Servers	Tomcat 9.0
FrameWorks	Spring 5.x, spring boot 2.x, Hibernate
Spring modules	Core, jdbc, dao, mvc, orm, data jpa, restfull
Tools	Log 4J, git, maven, gradle, AWS
IDEs	Eclipse, STS, IntelliJ

Project Profile :

Project:- 1

Title : Hotel Reservation Management System
 Client Organization : India
 Team Size : 8
 Duration : 3 Year
 Role : Back End Developer

Description :-

Hotel Management System that allows the hotel manager to handle all hotel activities online. Interactive GUI and the ability to manage various hotel bookings and rooms make this system very flexible and convenient. The hotel manager is a very busy person and does not have the time to sit and manage the entire activities manually on paper. This application gives him the power and flexibility to manage the entire system from a single online system. Hotel management project provides room booking, staff management and other necessary hotel management features. The system allows the manager to post available rooms in the system. Customers can view and book room online. Admin has the power of either approving or disapproving the customer's booking request. Other hotel services can also be viewed by the customers and can book them too. The system is hence useful for both customers and managers to portable manage the hotel activities.

Environment :

JDK 1.8, J2EE, springboot 2.3, Oracle11g, Eclipse, SQL developer, maven, GIT, Log4j and etc.

Project:- 2

Title : Bio Material
 Client Organization : New York
 Team Size : 2
 Duration : 2 Year
 Role : Front End And Back End Developer

Description : -

This site is meant for users to store, retrieve, and visualize physical properties of food materials. To start your adventure, type a food name into the input box and click 'Search'. This will bring you to a page listing the names of foods matching the input. For each food there will be two options, represented by little icons of a magnifying glass and a pencil. The magnifying glass will lead you to a page where you can view formula data corresponding to a chosen input food. The pencil icon will allow the input of new data points representing measurements of properties like temperature, density, thermal conductivity, etc... In the data view page, you can select data for plotting. For a given food, there will be choices for the y-axis variable, and the corresponding x-axis variables (These are provided such that there is a formula that maps from the x-axis to the chosen y-axis variable. Select the desired range for the x-axis variable and select both checkboxes. Given the prior selections, the site will automatically determine the possible formulae. If the formula requires composition information for the chosen food (E.G. is not a function of only the x-variable), input boxes will appear, filled with the food's composition information for the given properties if it exists (i.e. if there are measurements for carbohydrates and fat, those will be filled in), or 'NOT_FOUND' if the property is not found in the database. The 'Plot' button will chart the given formula and points. The update page will allow you to input data points or new formulas.

Environment :

**JDK 1.8, J2EE, springboot 2.3, MySql, STS, maven, GIT, Log4j and HTML, CSS
JavaScript, JQuery, Ajax, Bootstrap etc.**

Responsibilities:

- Analyzing the design document, Interaction with Client
- Used Spring framework for Dependency Injection
- Involved in code enhancement, Defect fixing
- Resolving the production issues reported by the client users.

Personal Profile :

Name	: Lokesh Ingale
Gender	: Male
Date of Birth	: 29th Sept, 1996
Nationality	: Indian
Languages Known	: English, Hindi, Marathi
Permanent Address	: Main Road Nashirabad, Jalgaon-425309, Maharashtra

Date:
