Ph.: 9538522953

Objective

To secure a challenging position to effectively contribute my skills as a Professional with a job that gives me a thrust for knowledge and provides job satisfaction.

Job Responsibilities

- Developed visualizations and dashboards using Tableau Desktop.
- Building, publishing customized interactive reports and dashboards, report scheduling using Tableau server
- Created action filters, parameters and calculated sets for preparing dashboards and worksheets in Tableau
- Developed Tableau workbooks from multiple data sources using Data Blending.
- Database used are SQL, Postgres SQL, Google Big Query.
- Scheduling of jobs in Airflow in the Google Cloud environment and monitoring of the job.
- Hands on experience on QC, RQM and JIRA with Zephyr plugin
- Manual and automation testing, functional and performance testing execution of assigned modules for apps, web services, web app from different domains.
- Test Case Writing, review, peer review and Management.
- ComScore and video plaza testing

Industry and Functional Expertise

- Overall 9+ years of experience in IT Industry
- 2 years of relevant experience in Tableau and knowledge on Microsoft Power BI.
- 4 years of experience in Manual testing {Mobile App testing on iOS, Android, Windows devices}. Desktop application testing on Browsers [IE, Chrome, Safari]
- 3 years of experience on Microsoft SCOM monitoring

Tools/Domain Experience

- Data Domain: Banking, Retail, OTT, Products
- Application/Tools: Tableau, Microsoft Power BI, Spark, Google Cloud Platform
- Programming tools: SQL, Google Big Query, SOQL
- Testing Tools: Seetest, Perfecto

Tableau Experience

- Building, publishing customized interactive reports and dashboards, report scheduling using Tableau server.
- Created action filters, parameters and calculated sets for preparing dashboards and worksheets in Tableau.
- Restricted data for users using Row level security and User filters.
- Developed Tableau visualizations and dashboards using Tableau Desktop.
- Developed Tableau workbooks from multiple data sources using Data Blending.
- Updating the Business Requirement documents for the Dashboards developed which includes the logic, filters, fields used for creating the dashboard
- Creating UT documents and also performing the complete dashboard testing which was performed as part of Testing activities

Power BI Experience

- Imported data from SQL server, Excel to Power BI to generate reports.
- Created DAX queries to generate computed columns in Power BI.
- Tried creating new store procedure and optimizing the existing queries
- Created Azure Blob storage for import or export data to or from csv files.

Major (milestone) projects - Selected

- **ALSC (Accenture Life Science) – Jan 2020 to Sep 2020 – Accenture, Bangalore**
 - Was responsible in developing the dashboards related to life science. Developed a POC dashboard for the Sanofi Client, using one of the existing dashboards by using the Google Big Query as the database.
 - Dashboard developed was mainly related to Studies and Subjects related to studies. Study Enrollment, Actual vs Planned Study, Site activation for each subject
 - Involved in creating a report in MS Power BI to compare the same with the existing tableau dashboards
- **WESTPAC – June 2019 to Dec 2019 - Accenture, Bangalore**
 - Was responsible for developing the management level incidents, risks, control, customer remediation dashboards. All the dashboards were derived based on Business Unit, Division etc.
 - All were non-financial dashboards. Data were derived from the SQL database
- **COSTCO WHOLESALE CORPORATION– Dec 2018 to May 2019 - Accenture, Bangalore**
 - Responsible for developing the Costco wholesale dashboards to the Korean clients. Dashboards developed were eCommerce Management report, Sales TY vs LY, Order Reconciliation report, KPI report.
 - Reports were developed to show the Orders and Sales based on YTD, PTD, WTD and on Period key.
 - Data were derived from Google Big query.
 - Jobs were scheduled in Airflow in the GCP environment, which was to get the data filtered and moved into Google big query

➤ **Radius Health [Intelligent Patient Solution] - – April 2017 to Dec 2018 - Accenture, Bangalore**

- Writing test cases for different Streams ex: ODS to MDM, MDM to ODS , Xponent, Priority, File transferring etc.
- Responsible for validation of data between the source and target files.
- Executing queries in DB [Cassandra]
- Executing Salesforce Object Query Language (SOQL) to get the data for testing the priority stream.
- Writing the shell script for validating the data between the inbound and outbound files received.

➤ **Ecolab MGM– June 2016 to March 2017 - Accenture, Bangalore**

- Writing test cases for iOS devices
- Updating test cases in Zephyr and executing the same.
- Creating new test cycles for each sprint and uploading the test cases
- Logging the defects in JIRA and validating after the fix.
- Attending daily stand up calls with onshore team and weekly backlog and sprint grooming calls with client.
- Query running on the database to check data displayed on the app.
- Use of Xamarin Android Player for testing of the app on the android device.
- Sending push notification message for the registered devices and verifying the same.
- UI testing using some of the chrome extension. E.g.: Page ruler, color picker [for checking RGB values]
- Use of Postman application for API testing.

➤ **AVS R3 Hotstar – March 2015 to April 2016 - Accenture Bangalore and Client location Mumbai**

- Writing Test cases for various devices (Android, iOS and desktop [Chrome and safari]) for the CR implementation and future releases using FSD's.
- Manual execution of the test cases on Android, iOS, Web and iPad.
- Involved in automation testing using See test.
- Reviewing the test cases internally.
- Backend test using comScore to validate whether the tags for the videos are firing correctly.

- Video plaza testing to validate whether the ADV rolls are firing properly and we are getting the correct values.
- Payment testing using credit and debit cards.
- Executing test cases in Zephyr and logging bugs in JIRA.

➤ **Rogers- December 2014 to March 2015 - Accenture Bangalore**

- Writing Test cases for various devices (Android, iOS and desktop [Chrome and safari]) using various user journey scenarios.
- Manual execution of the test cases.
- Involved in automation testing using Perfecto Technology and Selenium IDE.
- Running the test scripts in RQM.
- Raising valid defects in CQ and Reviewing the test cases internally.

➤ **Servigistics – August 2014 to October 2014 - Client location [EMC2] Bangalore**

- Writing test cases for both Android and iOS devices.
- Loading scripts to QC.
- Execution of the test cases in QC.
- Installing of the new builds on the device and testing the same.
- Testing of the same application in the web browser.
- Identifying errors and bugs.
- Reporting of issues to the client and development team.

➤ **Resource OG June 2014 to July 2014 - Accenture Bangalore**

- Writing test cases for iOS
- Installing of the new builds on the device and testing the same.
- To perform performance, functional and load testing on the device and app.
- Reporting of issues to the client and development team.

➤ **Equiniti – Feb 2011 to March 2014 – Accenture Bangalore**

- Performing Server reboot on the remote desktop server.
- Raising tickets with the vendor for any third-party hardware support.
- Involved in patching activity over the weekend
- Creation of new users in the active directory and adding them to required domains, group and mailing address
- Guiding users to create new personal folder in outlook (.pst files)

Internal Trainings at Accenture

- Tableau
- Google Big Query
- Devops

Academics

- Qualification: B.E. (Instrumentation technology).
- Institution: R V College of Engineering (Visvesvaraya Technology University), Bangalore, Karnataka.
- Year of Graduation: 2010.
