# **Project undertaken**

## **Ecommerce ( [Link](#) )**

Currently working on the project of 30 item E-Commerce with the fully functional cart In which a user can log in by the Facebook or google API, Every product has its individual Ejs page with data is being stored in three different collections in MongoDB atlas.

## **Anonymous Secrets ( [link](#) )**

A fully anonymous platform to vent your bottled-up emotions without fear of being judged. This website stores data in two database collections, One is used for login, and the second is keeping secrets this is how secrets are never linked to the person who uploads them.

## **Personal website ( [link](#) )**

My Personal website is written in Node js, My website is short, sweet, humorous, and to the point, which is authentic to my voice. The front end is supported by JavaScript, Bootstrap the server is launch by Express and the website is hosted on Heroku cloud.

## **To-do list ( [link](#) )**

A To-do list is a list of things to do, my to-do list web page allows the user to add/delete the task in a single click. User can make as many lists he/she wants to make by changing just URL address.

## **Drum kit ( [link](#) )**

It is a static web page written in simple HTML, CSS, JavaScript in which user can play drum by simply pressing keys on their keyboard and the web page is hosted on Netlify cloud
