MAJOR PROJECTS SUMMARY

PBM (Plan Benefit manager)

Description:

- PBM stands for Plan Benefit Manager.
- PBMs are companies that manage prescription drug benefits on behalf of health insurers, Medicare Part D drug plans, large employers, and other payers. By negotiating with drug manufacturers and pharmacies to control drug spending, PBMs have a significant behind-the-scenes impact in determining total drug costs for insurers, shaping patients' access to medications, and determining how much pharmacies are paid.

Job Responsibility:

- Working for Technical Design Documents and Develop for backend part creation of tables, creation of procedures, packages, triggers, automated jobs and other parts of the project using the PL/SQL.
- Working on Edits Rule to apply on claims logic to identify the claims cost and rejections based on the configuration for specified Edits.
- Being a Senior PLSQL developer, development of creation of tables, creation of procedures, packages, triggers, views, materialized views, scheduled job, SQL queries and other parts of the project using Oracle PL/SQL technology as per Agile methodology.
- Performance Tuning of SQL Queries as per requirement and implement the logic accordingly.

Environment:

- Oracle PL/SQL, PLSQL Developer, SQL Developer.

Client:

- Centene (Health Care), USA.
- Amazon (Health Care), USA

SCaRT (AT&T Global)

Description:

- SCaRT stands for Storage Capacity Reporting Tool.
- This tool is currently in use at AT&T for the purpose of presenting and auditing the capacity of enterprise storage within multiple data centers.
- SCaRT collects, parses, presents and trends various aspects of the storage infrastructure.

Job Responsibility:

- Worked for Technical Design Documents and Develop for backend part creation of tables, creation of procedures, packages, triggers, views, materialized views, scheduled job, automated jobs and other parts of the project using Oracle PL/SQL technology as per Agile methodology.
- Prepare high level design for project modules, detailed level design for various functionalities, procedures. Review and base line software code.
- Team handling experience. Team size: 8.

Environment:

- Oracle PL/SQL, TOAD 11.6

Client:

- AT&T Global, USA.

Data Commerce (AT&T Global)

Description:

- This is source of products available for HP, Graybar, Cisco, Juniper and Avaya vendor.

Job Responsibility:

- Data Migration from existing Database to current database using PL/SQL Procedures.
- Vendor file uploads in csv format and then inserted data into specified tables using PL/SQL.
- Created module for applying discounts on products using Oracle PL/SQL.
- Worked on many other modules like move n copy products from one site to another, created database script inserting and deleting news, country etc.
- Worked on Technical Design Documents and Develop for backend part creation of tables, creation of procedures, packages, triggers, automated jobs and other parts of the project using Oracle PL/SQL.
- XML parsing and inserted data into tables using Oracle PL/SQL technology.
- Prepared High Level Design Document for project modules, detailed level design for various functionalities, procedures.
- Review the base line software code.

Environment:

- Oracle PL/SQL, TOAD 10.0, jDeveloper.

Client:

- AT&T Global, USA.

MERLIN (Apple HR Module)

Description:

- Merlin takes some of the complexity out of managing people across country borders by providing one HR management tool that works for people worldwide and by keeping track of the differences between geographical regions.
- It is based on Employee Database applications like Leave Module, Bonus, Routing Service, PINPAN service, TCP Module, Payroll Global Management, Recruitment Service and Performance Review.

Job Responsibility:

- Worked on Recruitment Webpage development, Payroll Global Management, Recruitment Service and Performance Review projects as part of Merlin account.
- Created the Technical Designed Document according to project requirement. Setup the calls and implements all the project requirements.
- Development of backend part of reports, forms, table maintenance screens and other parts of the project using Oracle PL/SQL technology.

Environment:

- Oracle PL/SQL, SQL Developer

Client:

- Apple, Cupertino, CA, USA.

PROFESSIONAL ACHIEVEMENTS

- **Best Team (Quarterly)** for Q1 2011-2012 at Infosys.
- **Best Employee of the Month** for June 2010 at Offshore Techno Labs.
